2024 ULSAN PORT AUTHORITY SUSTAINABILITY REPORT

PORT ————— CONNECTS ————— THE WORLD

About this report

UPA Promotional Design (Poster) Contest Grand Prize Winner

Report Overview

Ulsan Port Authority (hereinafter, “UPA”) published its first sustainability report in 2012 to communicate its management performance across economic, social, environmental, and governance areas to internal and external stakeholders, as well as to listen to stakeholders’ expectations and needs. This 2024 report reflects the story of UPA’s past, present, and future directions in achieving the vision of “Eco-Smart Port Leading Energy Logistics.” To actively incorporate stakeholder feedback and comprehensively assess the financial and non-financial impacts of corporate activities on society and the environment, a double materiality assessment and stakeholder interviews were conducted to identify key reporting issues. Moving forward, UPA will continue to transparently disclose ESG management information and actively engage with various stakeholders through the sustainability report.

Reporting Period, Scope, and Boundary

The reporting period covers July 1, 2022, to December 31, 2023, and includes data from the past three years to allow for trend analysis of quantitative performance. Data with annual fluctuations is based on the fiscal year-end date (December 31), and, if necessary, specifies any distinct data collection periods requiring additional disclosure. This report primarily focuses on the environmental, social, and governance performance of the headquarters and Ulsan Port, with some disclosed data also including overseas operations.

Reporting Guidelines

This report adheres to the Core Option of the Global Reporting Initiative (GRI) Standards, an international guideline for sustainable management reporting, to ensure transparent disclosure of sustainability performance. It also incorporates key agendas from the UN Global Compact principles, K-ESG, and ISO 26000. Financial performance is reported in accordance with the Korean International Financial Reporting Standards (K-IFRS). To ensure the reliability and fairness of the reported information, the report has undergone verification by an independent third-party verification agency, with the results included in the verification statement.

Additional Information on the Report

UPA’s sustainability report can be accessed and downloaded through our website. For more detailed information or any inquiries, please contact us using the information provided below.

CEO Message

We aim to develop Ulsan Port as a specialized energy port in Northeast Asia, and transform it into a smart port that prioritizes the environment, safety, and customer needs.

Dear Esteemed Stakeholders,

Ulsan Port Authority is the institution responsible for managing and operating Ulsan Port. Since our establishment in July 2007, we have made every effort to develop Ulsan Port into a competitive maritime logistics hub, contributing to the advancement of the national economy. Since its opening in 1963, Ulsan Port has faithfully performed its role as the most significant industrial resource port in the country, growing to handle approximately 200 million tons of cargo annually. In particular, it has firmly established itself as the number one port for liquid logistics in South Korea. We are also preparing for our second leap forward by developing the Ulsan New Port distriperk and smoothly advancing the Northeast Asia Energy Hub project while leading the Fourth Industrial Revolution in port operations with big data. In 2023, we successfully supplied “the world’s first green methanol and biodiesel as marine fuel” and achieved the highest rating in the “Mutual Growth Evaluation” from the Ministry of SMEs and Startups, marking a meaningful year in our efforts to practice and promote ESG management.

We are committed to advancing even further in 2024, without resting on its achievements, to ensure sustainable growth.

First, we aim to establish ourselves as a leading eco-smart port.

As an “Eco-Smart Port Leading Energy Logistics,” UPA has steadily advanced projects such as the LNG cluster and the green hydrogen logistics hub, achieving significant milestones. The ongoing port-led LNG bunkering project, the first of its kind in Korea, will establish a foundation for eco-friendly marine fuel supply. In response to the designation of the Ulsan New Port distriperk as an eco-friendly specialized zone, UPA will endeavor to secure infrastructure for green energy production and logistics timely.

Secondly, we will accelerate mutual growth in connection with the port ecosystem and strengthen safety management.

We will take the lead in supporting the growth of SMEs within the port ecosystem and revitalizing the local economy through the development of new technologies in the port

We aim to develop Ulsan Port as a specialized energy port in Northeast Asia, and transform it into a smart port that prioritizes the environment, safety, and customer needs.

industry and support for domestic and international markets. UPA can be considered one of the ports most sensitive to external risk environments due to its geopolitical conditions. With the recent earthquakes on the East Coast and frequent global weather anomalies, Ulsan Port is exposed to various natural disasters. Therefore, we will establish a Loss-Mitigation System to thoroughly prepare for disasters and minimize potential losses for our customers and national assets.

Third, we will further enhance ethical management practices.

Efforts will focus on establishing a fair governance structure and enabling the board of directors to function effectively as a supervisory body. UPA will also work to cultivate a culture of integrity and address factors that undermine transparency to transform itself into a more ethical and corruption-free organization. Additionally, the organization will advance its preemptive internal control systems. Through these efforts, UPA will strive to make ethical management grounded in a culture of integrity its proud hallmark.

On behalf of myself and the employees of UPA, we pledge to leverage our extensive experience in the port and related sectors to propel Ulsan Port's development as an "Eco-Smart Port Leading Energy Logistics." We ask for your continued support and encouragement as Ulsan Port advances and UPA leads a new era of growth for the port.

Thank you.

CEO, Ulsan Port Authority

Byeon, Jae Young

“Accelerated Implementation of Korea’s First Port-led LNG Bunkering Project”

: Advancement in establishing a foundation for eco-friendly marine fuel supply through the alleviation of major regulatory barriers and the development of supporting policies

“Successful World-First Supply of Green Methanol and Biodiesel as Marine Fuels”

- Achieved the world’s first PTS (Port-to-Ship) bunkering of green methanol and biodiesel for container vessels
- Successfully conducted the world’s first STS (Ship-to-Ship) bunkering of methanol for ultra-large container ships

“Designation of Ulsan New Port distriperk as an Eco-friendly Specialized Zone”

- Attracted investment in the distriperk complex (approximately 1.2 trillion KRW)
- Timely establishment of eco-friendly energy production and logistics infrastructure in connection with phase 1 of the energy hub and the national industrial complex

Social

Achieved the “Highest Rating in the Mutual Growth Evaluation” by the Ministry of SMEs and Startups in 2023

: Contributed to mutual growth by supporting the development of new port industry technologies, assisting with domestic and international market expansion, and advancing institutional and regulatory innovations

Awarded “Exemplary Public Administration Case, Grand Prize” in the Across Government Active Administration Program

: Allowed for concurrent operations in ‘cargo transport’ and ‘marine fuel supply’ businesses, with methanol (chemical product) added to the list

Received the “Outstanding Case in Public Institution Health and Safety Activities” Award from the Ministry of Employment and Labor in 2023

: Recognized for establishing the first quantitative safety management system in the port sector and developing an objective safety diagnostic tool

Attained The Highest Rating (Grade A) in the Ministry of Employment and Labor’s Subsidiary Management Evaluation for 3 Consecutive Years

: Enhanced employment quality through improved working conditions and the strengthening of professional competencies for subsidiary employees

Maintained “Zero Serious Accidents” for 5 consecutive years through pinpointed port safety management

- Led the nation in port safety by developing and testing Korea’s first Cargo Handling Safety Index, achieving recognition both domestically and internationally
- Established an inclusive safety network focusing on managing three major types of safety incidents and securing construction site safety

Achieved “Excellence in the National Safety Korea Training Evaluation” through Joint Civil, Government, and Public Sector Training

: Received the highest rating in a large-scale training exercise involving 17 organizations and 450 participants

Designated as Korea’s only Eco-friendly Marine Fuel Supply Port Eco-friendly Marine Fuel Supply Port

: Developed a comprehensive safety plan for various types of marine fuels

Awarded the “Minister’s Commendation in Maritime Safety” by the Ministry of Oceans and Fisheries

: Established a proactive preparedness system for large-scale and complex disasters across the port sector

Certified as an “Outstanding Disaster Reduction Enterprise” by the Ministry of the Interior and Safety

: Attained top-level response capabilities for complex disasters

Received the highest rating in the “Emergency Support Agency Capability Assessment” by the National Fire Agency

: Demonstrated strong, field-oriented disaster safety capabilities with swift responses to natural and societal disasters

Awarded the “Commendation for Excellence” from the Board of Audit and Inspection, the only public institution to receive this recognition

: Acknowledged for effective oversight mechanisms

Recognized as an Outstanding Institution for Integrity Initiatives by the Anti-Corruption and Civil Rights Commission

: Shared exemplary practices with 302 public institutions nationwide

Received the “Ethical Management Grand Prize” from the Korea Academy Of Business Ethics

: Honored for efforts in promoting a culture of integrity within the public sector

Awarded the “Transparent Management Grand Prize” by the Korea Management Registrar

: Recognized for improvements in mitigating factors that undermine transparency and for transparent information disclosure

Established an “Internal Control System” to strengthen the foundation of compliant and ethical management

: The first public institution to incorporate the Board of Audit and Inspection’s “Public Sector Internal Control Guidelines”

About UPA

Company Overview

UPA is a public institution established in July 2007 in accordance with the Port Authority Act to enhance the professionalism and efficiency of the development, management, and operation of Ulsan Port. We are striving to contribute to the development of the national economy by fostering Ulsan Port as a competitive shipping and logistics hub. We work for the development, management, and operation of the Ulsan port facility, logistics terminal, port distriperk complex creation and management, Ulsan port -related research, development and training, direct implementation and investment in Ulsan port-related incidental projects, and investment.

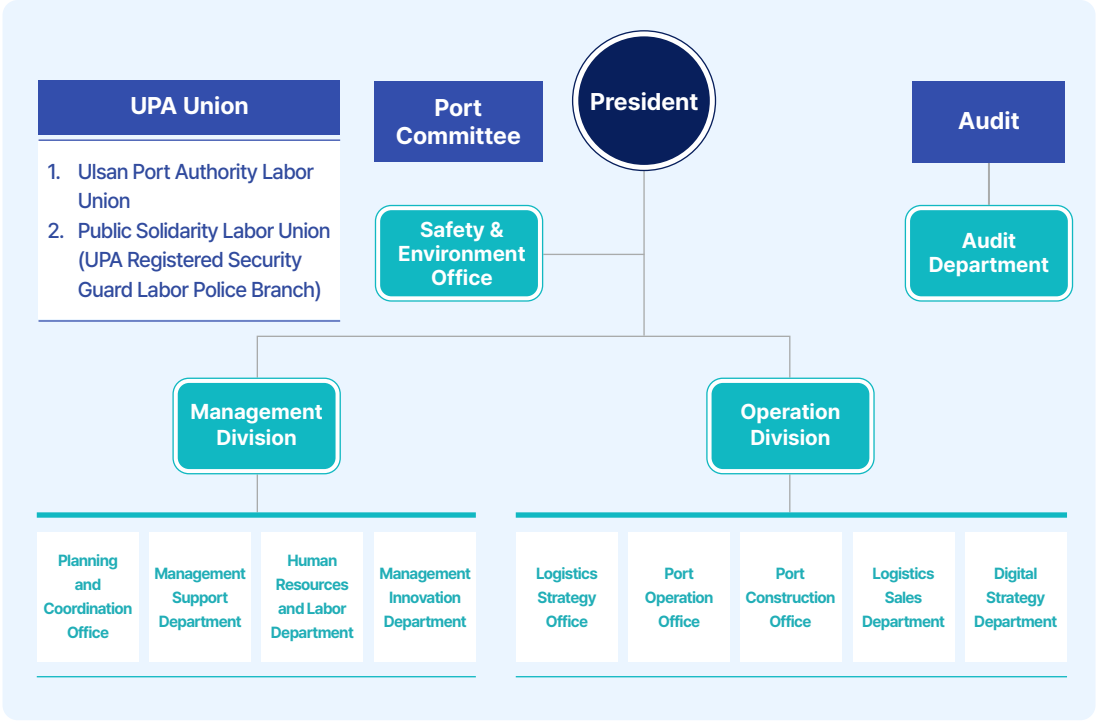

Major Business

UPA's main projects include the construction, management, and operation of Ulsan Ports including Ulsan Main Port, Onsan Port, Mipo Port, and Ulsan New Port, creation and management and operation of the port distriperk, and direct implementation, investment, and contribution of port-related incidental projects.

Ports and Facilities

UPA's main activities include the construction, management, and operation of Ulsan Port, including Ulsan Main Port, Onsan Port, Mipo Port, and Ulsan New Port; the development, management, and operation of distriperk Complex and the direct implementation investment, and sponsorship of various port-related ancillary businesses. Ulsan Port is a natural harbor with minimal tidal fluctuations, deep waters, and calm conditions, serving as a liquid logistics hub that supports the automotive, shipbuilding, and petrochemical industries located in the national industrial complex nearby.

Ulsan Main Port | Central Port of Ulsan

Berth Length	10,085m
Berthing Capacity	1,815,500 DWT, 60 vessels
Handled Cargo	Coal, general cargo, automobiles, liquid chemicals, etc.

Onsan Port | High-Value-Added Logistics Hub

Berth Length	5,073m
Berthing Capacity	1,807,000 DWT, 33 vessels
Handled Cargo	Ore, containers, oil, chemicals, etc.

Mipo Port | Support Port for the Shipbuilding Industry

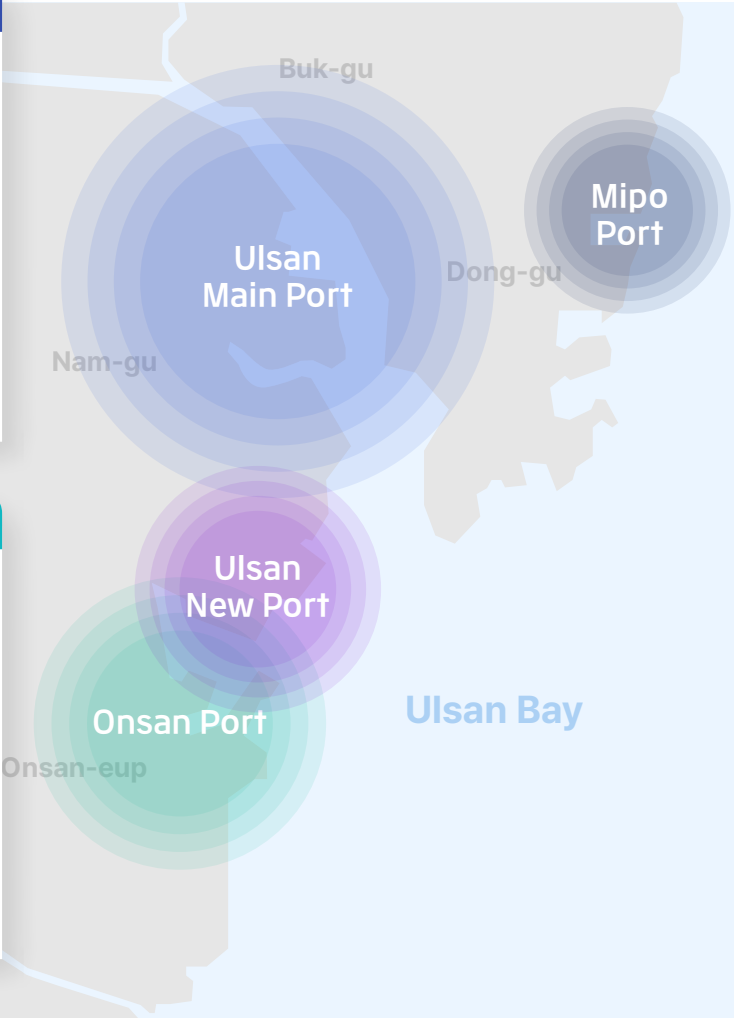

Berth Length	210m
Berthing Capacity	20,000 DWT, 1 vessels
Handled Cargo	Steel

Ulsan New Port | Leading Energy Hub of Northeast Asia

Berth Length	7,059m
Berthing Capacity	1,143,000 DWT, 29 vessels
Handled Cargo	Liquid chemicals, containers

Main Business

UPA is striving to transform Ulsan Port into a leading eco-friendly energy logistics hub in Northeast Asia. We are committed to demonstrating the highest level of competitiveness across various business sectors, including port logistics, port operations, and port construction and maintenance. To achieve this, we are forecasting future port demand changes and maximizing the benefits of the port by utilizing port infrastructure while enhancing Ulsan Port's competitiveness through digital-based smart port operations. Additionally, we are timely supplying the necessary facilities to meet future cargo demand and ensuring thorough maintenance for safe usage. UPA will continue to focus on fundamentals while steadily working towards new future business ventures, committing to ongoing innovation for sustainability.

Major Business Components of UPA

Port Logistics Business

Energy Logistics Hub Development, Increase in Port Demand

A project that maximizes port added value by predicting and responding to future port demand changes and generating cargo volume through the utilization of port infrastructure

< Liquid Cargo Handling Volume by Port >

Port	Volume (million ton)
Ulsan	155
Gwangyang	139
Daesan	71
Incheon	57

■ Largest Liquid Cargo Handling Port in Korea

Port Operation Business

Efficient Port Operation, Smart Port Operation, Sustainable Port Operation

A business that enhances the competitiveness of Ulsan Port by creating an efficient and sustainable port through digital-based smart port operations

Representative Industrial Support Port of South Korea

Port Construction And Maintenance

Balanced Development, Eco-Smart Port Construction, Safe Port Construction

A project that establishes a competitive port through timely facility provision and balanced construction of old and new ports according to future demand

ESG Management Strategy

ESG Management Strategy System

UPA is striving to create shared value in all areas of Environmental, Social, and Governance (ESG) management in response to stakeholder demands. Under the ESG vision of being “Energy Logistics Port Leading in Environmental, Social, and Transparent Management,” UPA has established three strategic directions: “Sustainable Eco-friendly Port,” “Safe and Inclusive Port,” and “Transparent and Responsible Port.” Based on these strategic directions, we are implementing various strategies and action plans to become a truly prominent ESG company.

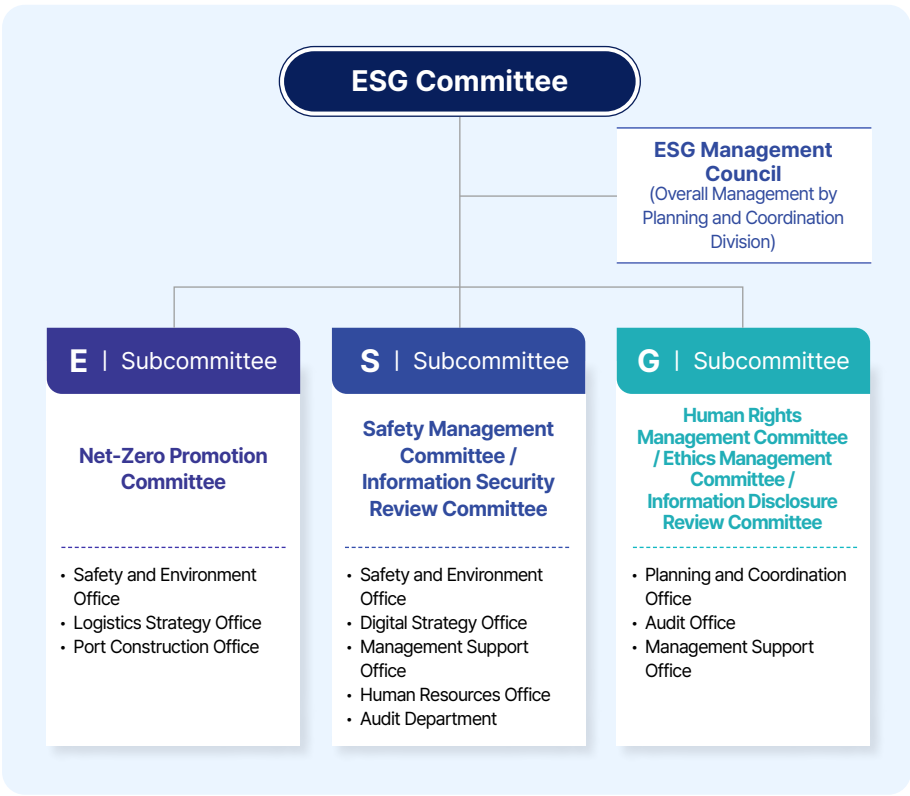

ESG Management Strategy System

ESG Vision			
ESG Slogan	The UPA Way, ESG Way		
2030 ESG Goal	Self-sufficiency of Directly Managed Facilities: 60%	Registered Greenhouse Gas Emission Allowance: 850 tCO ₂	Safety Management Rating: Grade 1
		Mutual Growth Evaluation: Excellent Grade	Integrity Rating: Grade 1
			Customer Satisfaction Rating: Excellent Grade (Highest Grade)
3 Strategic Directions	E Environment Sustainable Eco-friendly Port	S Social-Safety Safe and Inclusive Port	G Governance Transparent and Responsible Port
12 Strategic Tasks	<ol style="list-style-type: none">1. Establishment of a Climate Change Response System for Net-Zero2. Development of a Renewable Energy Self-sufficient Port3. Creation of an Eco-friendly Energy Logistics Hub4. Construction of Eco-friendly and Green Infrastructure	<ol style="list-style-type: none">5. Strengthening Governance Transparency by Expanding the Role of the Board6. Leading Compliance and Ethical Management7. Operating a Citizen Communication-based Governance8. Transparent Disclosure of Management Information	<ol style="list-style-type: none">9. Advancement of Disaster and Safety Management and Information Security Systems10. Creation of a Cooperative Growth and Win-win Ecosystem11. Enhancement of Personnel and Bolstering of Labor-Management Cooperation12. Contribution to Community Development

ESG Management Promotion System

The ESG Committee of UPA was established in accordance with Article 6 of the ‘UPA Port Committee Operating Regulations’ for strategic and systematic management of environmental, social, and governance areas. The committee actively deliberates on key management strategies, implementation plans, and issues related to UPA's ESG management. A working group called the ESG Management Council operates under the ESG Committee, which also has subcommittees for each area to support the efficient operation of the ESG Committee.

Stakeholder Engagement and Participation

Enhancing the Operational Process for Stakeholder Communication Channels

UPA defines its main stakeholder groups as customers, employees, local residents, relevant industry organizations, the public and media, academia, and the government, considering their impact and importance on the execution of sustainable management. To understand the needs of each stakeholder group, the Authority analyzes their voices through both online and offline surveys. To redefine customer types and enhance the operating processes of communication channels, a national communication committee called “Gonubis” has been established, with dedicated staff in each department responsible for engaging with stakeholders. As a result of proactive communication with relevant institutions and customers, the Authority achieved an excellent customer satisfaction score of 91.6 and received a satisfaction rating of 98.8 for community sharing programs in the Ulsan region. Moving forward, the Authority will continue to engage in active communication with stakeholders to incorporate their voices into management strategies, ensuring that the Authority grows in a more business-oriented manner while coexisting with its stakeholders.

UPA Public Communication Committee

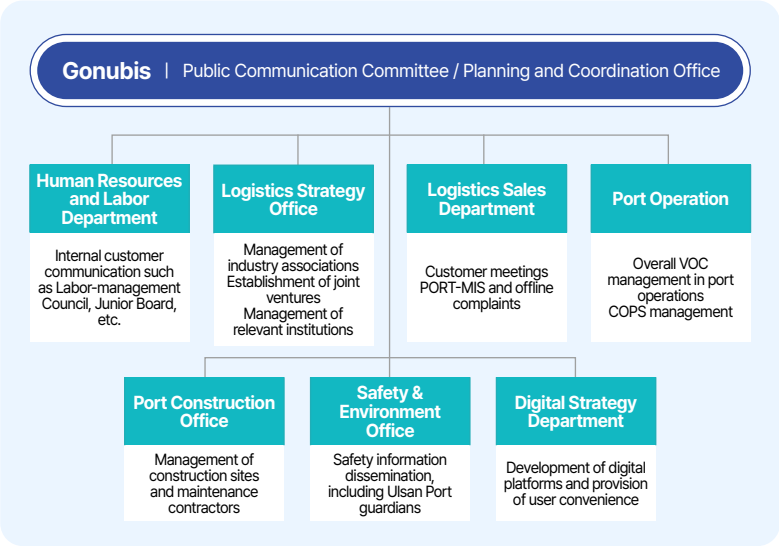

Control Tower

UPA Public Communication Committee <Gonubis>

(Chair: Head of Planning and Coordination Office,
Participants: Complaint-handling Staff from All Departments)

Operational Overview

- Enhancing public awareness through the redefinition of customer types and the advancement of operating processes for communication channels.
- Managing the entire cycle of complaint handling, from receipt to resolution and feedback, including the designation of dedicated departments for complaint reception and satisfaction management.

Identifying Key Needs by Stakeholder and Operation of Communication Channels

Category (Communication Strategy)	Value Creation Type	Value Consumption Type	Value Delivery Type		Value Sharing Type	
	"Timely Resolution of Internal and External Customer Complaints"		"Bolstering Collaboration on Local Issues"		"Enhancing Public Access to Information"

Kang Deok-ho

Chairman

UPA Labor Union

The UPA Labor Union negotiates with management to improve the working conditions and enhance the rights of its members, pursuing labor-management development based on labor laws. Recently, the new government's innovation policy for public institutions has emphasized the importance of trust and communication between labor and management, as well as stable solidarity to protect the rights of union members.

UPA is a relatively small organization with a young workforce, and while the individual capabilities of employees are high, the roles and responsibilities are overwhelming, leading to increased job fatigue. From the perspective of ESG management, improving the working environment for work-life balance, guaranteeing collective agreements and rights, and respecting diversity are top priorities. Additionally, establishing a human rights relief system and ensuring safety management in the workplace are also important.

The Authority demonstrates excellence in building an eco-friendly energy hub and in community co-prosperity; however, there is a need for diversification of ESG projects and improvements in supply chain support. Finally, establishing healthy labor-management relations and a positive organizational culture is essential for overcoming conflicts and enhancing long-term value. This is a crucial element that we must all pay attention to in order to grow into a sustainable public enterprise.

Kim Hae-ryong

Professor

Department of Business Administration, Ulsan University

Since 2015, I have served as a professional committee member for recruitment and internal evaluation at UPA, and from 2022, I have held positions as a Port Committee member and an ESG Committee member for two years. Recently, the main issues for the Authority include the establishment of an eco-smart port, operation of an environmentally specialized port, and transparent information disclosure and fair management.

UPA has a strong B2B nature and is well-known as a key export channel for the industrial city of Ulsan, primarily focused on liquid cargo. However, we have the drawback of weak communication with the general public. From the perspective of ESG management, creating sustainable economic value, stakeholder communication, fair customer communication, ESG management of the supply chain, and establishing an environmental management system are essential.

UPA maintains social contributions through transparent and responsible management, but there is a lack of awareness regarding contributions to the local community, and there is a need for issue-based leadership. Expanding leadership from safety-centered management to relevant institutions and the local community is essential for realizing social value.

Chung Mi-hong

Project Leader

SK Gas Bunkering Business Development Group

We are collaborating with UPA as a partner to promote a joint venture for eco-friendly LNG bunkering. The key issues I see for the Authority are the establishment of an eco-friendly port for carbon neutrality, development of related infrastructure, and safety management.

UPA is recognized as an organization with expertise and integrity based on rational and transparent internal processes. For sustainable management, it is important to expand eco-friendly products and services, establish TAX policies related to eco-friendly incentives for building an eco-friendly port, respond to climate change, reduce pollutant emissions, and manage ESG in the supply chain. While UPA has a rapid response capability and a transparent governance structure for a swift transition to eco-friendliness, there is a need to enhance competitiveness in external financing. Utilizing the geographical advantages of the southeastern region, establishing a sustainable eco-friendly port is a top priority, and I believe there is great potential to develop into an eco-friendly logistics hub through public-private partnerships.

Kim Eun-suk

Chairman

Social Cooperative
Startup Job Research Institute

We are conducting various projects in the community with donations received from UPA to support social economy enterprises and small businesses. I believe that the biggest focus for UPA is the establishment of advanced smart and eco-friendly port systems in the era of digital transformation.

The Authority is creating a healthy profit structure through the high performance capabilities of its employees and has a proactive image in social contribution activities. From an ESG management perspective, it is crucial to address issues such as reducing energy use, fair recruitment, strengthening social contribution activities, expanding stakeholder communication, and creating sustainable economic value.

While UPA is generating environmental and social value through cooperation with the local community, there is a need to increase communication opportunities with various stakeholders. Establishing an eco-friendly port system and implementing effective incentive policies are essential for addressing climate change, and efforts to solve community issues are imperative.

Han Hu-kwang

Senior Labor Consultant

Labor Law Firm U&

I have a labor advisory contract with UPA, providing regular consultations and occasional consulting services. The key issues I see for the Authority include ESG management and the prevention of serious accident punishment laws, and I am actively focused on tasks such as labor-management harmony and management participation.

UPA is recognized as an excellent institution in labor relations, with highly capable HR personnel and a stable organization. For sustainable management, it is important to ensure fair recruitment, work-life balance, workplace safety management, respect for diversity, and expanded communication with stakeholders.

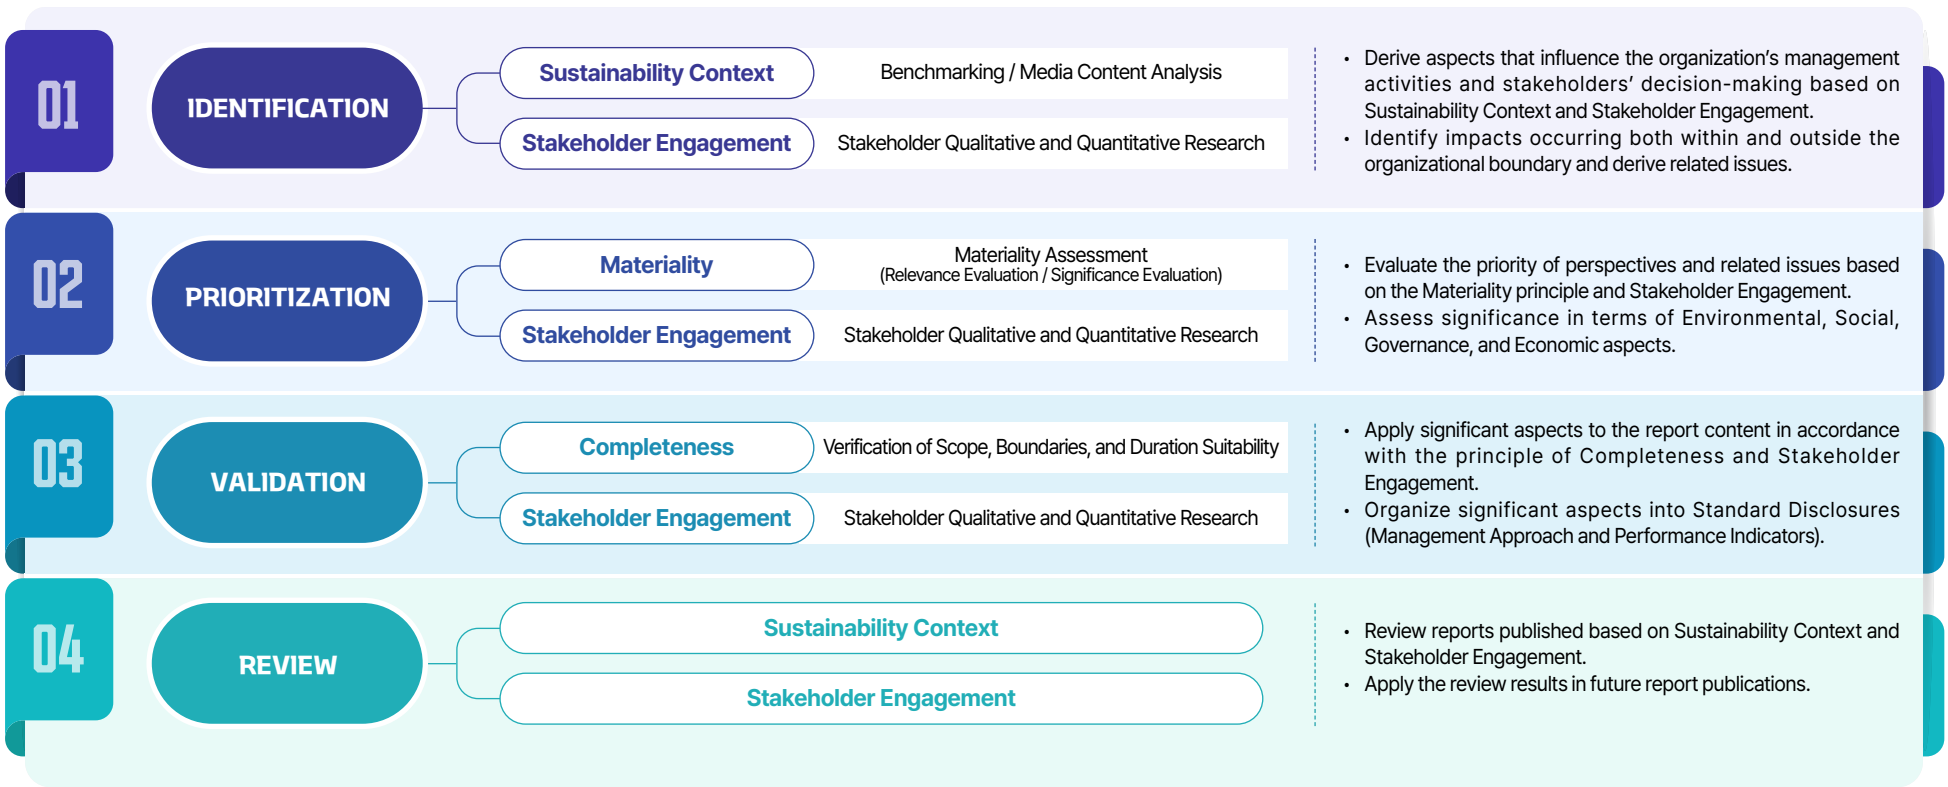

The Authority acknowledges the importance of ESG management and is strengthening its social contribution activities and transparent governance structure, which bodes well for continuous growth. The most critical issue is workplace safety and employee health management, which are essential for increasing employee engagement and preventing industrial safety risks. Ongoing attention to safety and prevention will continue to be significant challenges in the future.

Materiality Assessment

UPA has conducted a double materiality assessment to identify and prioritize key issues that require focused management by comprehensively incorporating ESG (Environmental, Social, and Governance) issues throughout our operations for sustainable management. To selectively manage and report on issues of greater significance to the Authority and its stakeholders, we have identified key ESG management issues following the double materiality assessment method recommended by GRI and ISO 26000.

Materiality Assessment Process

UPA has conducted an internal and external environmental analysis and materiality assessment based on the principles of Sustainability Context, Materiality, and Completeness, as well as Stakeholder Engagement, as outlined in the international reporting standard GRI, to identify key issues in ESG management.

Materiality Assessment

Benchmarking

Based on the sustainability reports of domestic and international companies that excel in ESG management, an analysis of sustainability performance was conducted in accordance with GRI reporting principles. Through this analysis, additional issues that UPA needs to address and advance were identified.

Media Analysis

We analyzed sustainability performance using the sustainability reports of domestic and international companies recognized for their excellence in ESG management, applying GRI reporting principles. This analysis identified additional issues for UPA to address and implement.

Expert Interviews

Expert interviews were conducted with stakeholder groups defined according to UPA's value creation flow. Requests and shared values of internal and external experts representing these groups were carefully examined and reflected in identifying key issues.

Stakeholder Surveys

A survey was conducted among key stakeholder groups—including employees, customers, local communities, and relevant industry associations and organizations—to evaluate the ESG management issues of UPA. This survey considered the legal, financial, and operational responsibilities and impacts of UPA's management, and the results were incorporated into the materiality assessment.

Eco-Friendly and Net-Zero Strategy

Eco-friendly and Net-Zero Strategy System through Analysis of Ulsan Port and UPA Characteristics and Environmental Analysis

UPA has established a strategic system for eco-friendliness and Net-Zero by analyzing the environmental impacts of port operations and the internal and external management environments. Greenhouse gases are emitted due to the use of fossil fuels during vessel operations and berthing, and dust is generated during cargo handling, which were identified as sources of pollution in port operations. By analyzing various regulations, environmental strategies, and mid-to-long term ESG (Environmental, Social, and Governance) management strategies, we have established the most suitable and efficient eco-friendly and Net-Zero strategy system for the organization. Moving forward, we aim to create Ulsan Port as a leader in promoting eco-friendly and net-zero policies in shipping, port management, and the local community.

Eco-friendly and Net-Zero Strategic Framework

Ulsan Port 2035 Net-Zero Strategy for Accelerated Realization of Net-Zero

UPA established a strategy in July 2021 to achieve a 30% reduction in greenhouse gas emissions by 2030, with a goal of attaining 100% carbon neutrality by 2050. Following this, the Authority developed more specific implementation strategies in response to carbon neutrality policies and various environmental changes both domestically and internationally. As a result, they shifted towards enhancing eco-friendly fuel bunkering projects that differentiate them from other ports and developed strategies to realize carbon neutrality ahead of schedule by 2035. By reflecting major environmental trends and policies, they detailed annual implementation tasks and budgets, thereby increasing the feasibility of the strategy.

Ulsan Port's 2035 Net-Zero Strategy

Initial Strategy

(July 2021)

Strategy Advancement

(October 2022 ~ October 2023)

New Strategy

(November 2023)

Target | Reduction of Ulsan Port's Greenhouse Gas Emissions by 30% by 2030, 50% by 2040, and 100% (Net-Zero) by 2050

Improvements

- Changes in internal and external carbon neutrality policies since the initial strategy formulation (strengthening of policies) → Necessitates reflection of environmental changes.
- Insufficient reflection of Ulsan Port's and associated institutions' characteristics, resulting in a general strategy → Lacks specificity (feasibility) in strategy formulation.

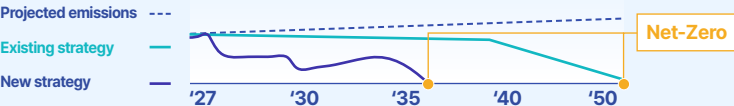

Analysis and Reflection of Internal and External Environment (Changes)

- Analysis of Ulsan Port's carbon emission characteristics and projected emissions until 2050
- Incorporation of the latest carbon neutrality strategies from the Ministry of Oceans and Fisheries, IMO, EU, etc.
- Integration of mid-to-long term management strategy and eco-friendly fuel business plans of the institution

Strategy Refinement and Validation

- Development of a Ulsan Port customized strategy
- Detailing annual reduction scenarios and appropriate budget allocation
- Strategic consultation with environmental and maritime experts and research institutions

Category	2027	2030	2035(Net-Zero)
Major Reduction Projects	Slow steaming for LNG and methanol bunkering vessels	Introduction of hydrogen fuel cells and electrification of cargo handling equipment	Expansion of ammonia bunkering and blue carbon (marine ecosystem)

Promoting Eco-Friendly Energy Specialized Ports and Eco-Friendly Slow Steaming Operations

Eco-Friendly Energy Specialized Port

UPA has established an eco-friendly energy specialized port, enabling Ulsan Port to leap into a decarbonization hub in the shipping sector. In light of the adoption of carbon neutrality goals and the regulation of greenhouse gas emissions from ships, Ulsan Port has successfully facilitated the bunkering of new eco-friendly fuels, namely green methanol and biodiesel.

In connection with this, we have improved the bunkering-related systems for new fuels and reflected these in national policies. For these achievements, we were awarded the “Exemplary Public Administration Case Grand Prize” in the across government active administration program. Both Ulsan Port and Ulsan New Port have been designated by the Ministry of Oceans and Fisheries as a hub port for eco-friendly ship fuel and an eco-friendly energy specialized zone, respectively. By using green methanol and biodiesel, we were able to reduce greenhouse gas emissions by 95% and 75%, respectively.

Implementing Ship Type Tailored System to Promote Eco-Friendly (Slow) Navigation

The Vessel Slow Navigation Program (VSR) is a system that provides up to a 40% discount on port entry and exit fees for vessels or shipping companies operating at slow speeds. This is because a decrease in navigation speed reduces fuel consumption, thereby minimizing greenhouse gas and pollutant emissions. However, to qualify for the discount, vessels must operate at slow speeds for more than 60% of their annual port calls; this criterion was difficult to apply for liquid cargo ships that only call at ports 1 to 2 times a year. Therefore, liquid cargo vessels receive discounts for each instance of slow navigation, while common vessel types, such as container ships or car carriers, are encouraged to participate in the program through recognition of excellent shipping companies or by providing convenience for slow navigation participation. As a result of these efforts, common vessel types have achieved the highest VSR participation rate in domestic ports for four consecutive years, and special management vessel types, like liquid cargo ships, have reached an all-time high participation rate, increasing by 13.3% from the previous year.

Operation of Ship Type Tailored System

LNG Bunkering Business and Supplying Green Methanol and Biodiesel as Ship Fuel

Accelerated Implementation of “Port-Led LNG Bunkering Business”

UPA has secured global port competitiveness by the accelerated implementation of the country's first port-led LNG bunkering business. With the increasing demand for LNG-powered vessels, there was a need to expand domestic LNG bunkering infrastructure and foster the LNG bunkering industry in the southeastern region (Busan, Ulsan, Gyeongnam). However, due to the uncertainty in demand for eco-friendly ship fuel and the burden of initial market investments, it was challenging for private companies to lead the project.

In response, the Authority proactively established joint ventures to participate in the business despite high uncertainty and significant risks, acting as an active bridge for companies entering the market. Thanks to these efforts, regulations were alleviated, and systems were established, including the relaxation of mandatory pilotage and participation in technology development to ensure a smooth supply of eco-friendly ship fuel.

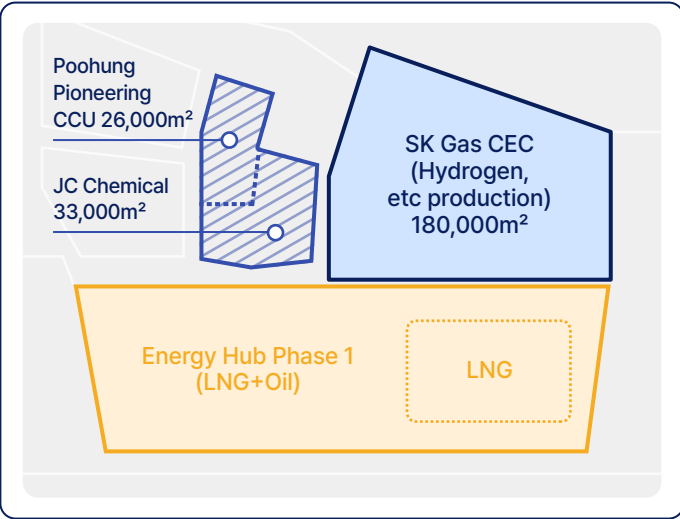

World's First Supply of Green Methanol and Biodiesel as Marine Fuel

With the strengthening of carbon regulations in the international shipping industry, there has been an increase in orders for eco-friendly vessels. Methanol fuel has emerged as an alternative eco-friendly ship fuel, and we have promoted agreements and seminars to address the recognition of methanol as a ship fuel and the easing of bunkering regulations. We assessed the risks of methanol bunkering and developed a safety inspection checklist, leading to a demonstration project for the supply of methanol as a marine fuel. As a result, we successfully completed the world's first PTS bunkering of green methanol and biodiesel for container ships and achieved success in methanol STS bunkering for the world's first ultra-large container ship. Recognized for our port-led efforts in eco-friendly bunkering, we received the Grand Prize (Prime Minister's Award) for Excellent Cases of Active Administration at the 2023 government-sponsored awards, and were selected as the best port in the climate energy category at the 2024 World Port Sustainability Awards (WPSP) organized by the International Association of Ports and Harbors (IAPH).

Designation of Eco-friendly Energy Specialized Zone at Ulsan New Port distriperk Area

The UPA distriperk Complex has been designated as a special area for eco-friendly energy. A distriperk Complex is an area where support facilities and port-friendly facilities are collectively established in the port area or in areas designated for port facility installation. Considering the characteristics of Ulsan Port, which ranks third in the world in annual liquid cargo handling capacity (153.15 million tons as of 2020), the Ministry of Oceans and Fisheries has designated the “Ulsan New Port Eco-friendly Energy Special Zone” to provide a stable business environment related to eco-friendly energy for tenant companies. To establish a large-scale hydrogen infrastructure within the distriperk Complex in connection with Phase 1 of the Energy Hub, regulatory improvements and policy support were necessary. During the project process, there were challenges, such as the need to modify and expand the business models of tenant companies to create a large-scale hydrogen complex in the second section of the distriperk Complex. However, we formed a consensus between government departments and companies regarding the designation of the special zone and strengthened communication and cooperation, which led to the successful designation. As a result of these efforts, we attracted approximately 960 billion KRW in large-scale private investment in the distriperk Complex. Additionally, we were able to secure eco-friendly energy production and logistics infrastructure in a timely manner in connection with Phase 1 of the Energy Hub and the national industrial complex.

Initiating Eco-friendly Infrastructure (AMP)

Even when the vessel is docked, it is necessary to operate essential equipment aboard the ship 24 hours a day, which results in emissions of air pollutants and greenhouse gases due to the operation of diesel engines. By stopping the diesel engine and supplying electricity to the docked vessel via AMP (Alternative Maritime Power Supply), we can prevent the occurrence of these pollutants. To promote the usage of AMP, UPA has held meetings and conducted surveys with AMP users to derive improvements and enhance the operating environment. As a result, the AMP usage rate increased by 4.1%, and the electricity consumption through AMP reached 1,731.9 MWh, thereby replacing the use of 386.6 tons of fossil fuel and reducing greenhouse gas emissions by 442.9 tons.

Improvement of the Usage and Infrastructure of AMP (Alternative Maritime Power Supply)

Improvement of Usage Environment	
Cost Reduction	Rapid Maintenance
<ul style="list-style-type: none">Current Status : Electricity rates have surged by 41.0% compared to the previous year (decreased price competitiveness compared to diesel).Economic effects of AMP are diminishing ▶ raising concerns about decreased usage demand. <hr/> <ul style="list-style-type: none">Improvements : Change in power supply contracts (tariff plan) (review and consultation of KEPCO terms).Switching the tariff plan from general use to industrial use can reduce electricity costs by up to 19.6%.	<ul style="list-style-type: none">Current Status : Essential onboard equipment (heating, cooling, etc.) operates 24/7.Continuous AMP management and prompt maintenance response are necessary. <hr/> <ul style="list-style-type: none">Response : Regular inspections of AMP by facility safety security officials at each terminal.In case of AMP failure, emergency maintenance is dispatched immediately.
Infrastructure Improvement	
Increase in Facility Capacity	Timely Establishment of AMP
<ul style="list-style-type: none">Current Status : Limitations in usage due to AMP equipment capacity.In the spring and summer (increased power usage), a maximum of 4 vessels can use the equipment simultaneously per unit. <hr/> <ul style="list-style-type: none">Improvements : Upgrading (replacing) equipment parts ▶ increase capacity by 39.5%.The number of vessels that can be used simultaneously per unit increases from 12 to a total of 22.	<ul style="list-style-type: none">Current Status : New vessels are scheduled to be deployed at Ulsan Port in 2024.This includes the Korea Coast Guard LNG pollution response vessel and hybrid (diesel + electric) tugboats. <hr/> <ul style="list-style-type: none">Response : Allocation of berths and expansion of AMP facilities (from 28 to 31 locations by 2024).Considerations will include the scale of incoming vessels and the timing of operations.

Enhancing Renewable Energy Through Efficient Space Utilization

UPA has set a mid-term goal to increase the energy self-sufficiency rate of direct-operated facilities from the current 15% (as of January 2023) to 18.8% by 2025. To achieve this, efforts have been made to expand renewable energy facilities. However, due to the characteristics of the location, which must not interfere with port logistics activities, it has been challenging to secure new sites. Through diverse discussions aimed at solving these issues, the idea of utilizing reconstructed facilities or outdoor parking lots was proposed. New solar power generation facilities were installed at these locations, which ultimately helped increase the energy self-sufficiency rate of UPA's direct-operated facilities.

Securing New Space for Renewable Energy Facilities

Buildings

- Installation Locations : Solar panels are set to be installed on the roofs of structures designated for reconstruction, such as aging guardhouses and control rooms.
- The designs for the reconstruction will specifically incorporate space for solar panel installation on the rooftops.

External Locations

- Installation Locations : Solar panels will be installed near the port entrance, ensuring a safe distance from loading docks to avoid operational interference.
- Installation of canopy-style solar panels is planned to maintain existing parking spaces. This design allows for solar energy generation without disrupting parking availability.

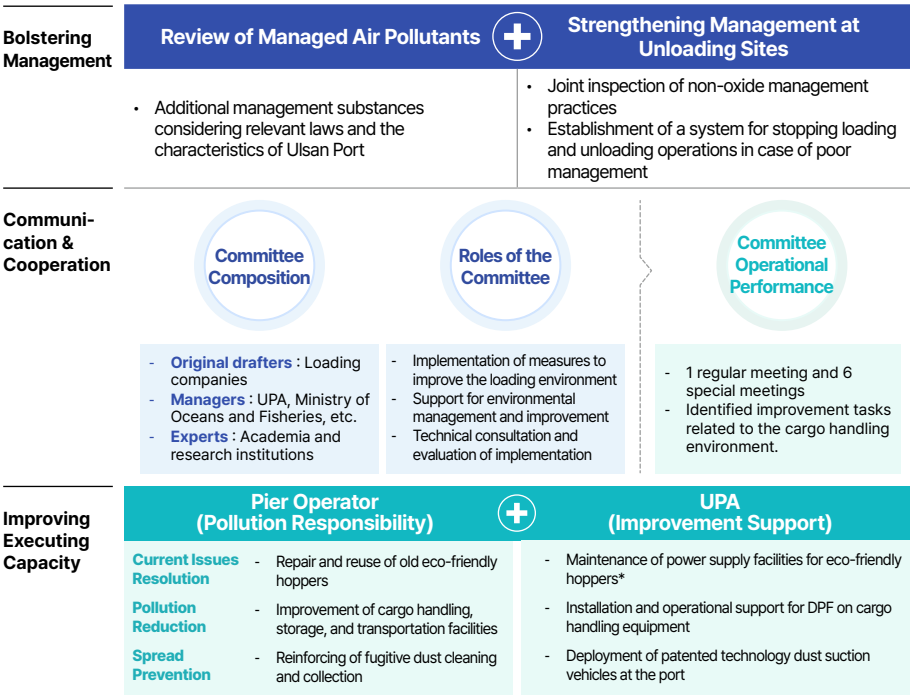

Improving Unloading Environment to Reduce Air Pollution and Enhance Waste Resource Circulation

Improving Unloading Environment Based on Communication and Cooperation for Air Pollution Reduction

After the COVID-19 pandemic, our logistics activities significantly increased, leading to a surge in cargo arriving at Ulsan Port. Consequently, the unloading sites were not managed properly, raising concerns about deteriorating air quality due to fine dust and other pollutants. To tackle this issue, UPA added more air pollutants to our management oversight and strengthened control over the unloading sites. We also formed a consultative body with unloading companies, the Ministry of Oceans and Fisheries, academia, and research institutions to select improvement tasks and provide support. As a result of these efforts, 17 unloading environmental improvement tasks have been completed, and all container handling equipment has been converted to eco-friendly machinery. Additionally, we successfully reduced air pollutants by 58.6 tons and the fine dust concentration has improved from 25.7 $\mu\text{g}/\text{m}^3$ in 2022 to 20.0 $\mu\text{g}/\text{m}^3$ in 2023, a reduction of 22.2%.

Initiatives Reducing Air Pollution (Ultra-fine Particles, etc.)

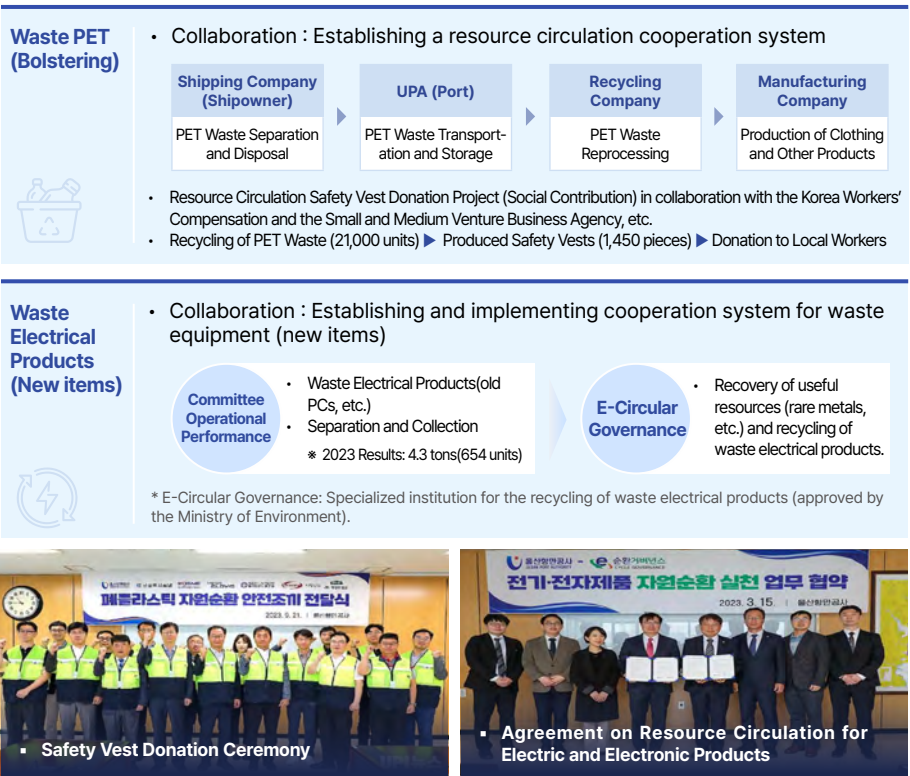

* Eco-friendly hopper: A dust collection unloading facility co-developed and manufactured by UPA and the stevedoring company in 2015 (reducing airborne dust by over 70%).

Building A Sustainable Ecosystem Based On Ulsan Port

Greenhouse gases are generated from waste landfilling and incineration, and there is a severe shortage of existing landfill and incineration facilities. To prevent the occurrence of these greenhouse gases, UPA has established a Resource Circulation Cooperative System. We recycle waste PET to produce safety vests, which are donated to local workers, and we recycle discarded electrical products to extract rare metals, among others. Through this collaborative system, we have generated 4 tons of circular resources (recycled plastics, rare metals, etc.) and reduced 11.5 tons of greenhouse gases. In 2024, we plan to develop a resource circulation cooperative system focusing on waste ropes from ships.

CCUS (Carbon Capture, Utilization, and Storage) Innovation Technology and Expansion of Public Awareness on Net-Zero

UPA has supported the discovery and activation of CCUS technologies for carbon neutrality and have worked diligently to enhance public awareness. We installed carbon capture units and provided a testbed where we can conduct pilot operations. In addition, we have posted card news and quizzes related to carbon capture units, transforming them into experiential courses to improve our public's understanding of carbon neutrality. As a result of these installations, we have achieved an effect equivalent to planting 807 pine trees annually, and our public awareness campaign significantly increased participants' recognition of carbon neutrality. Furthermore, our developer of the carbon capture units obtained approval for installation at a waste incineration plant in the United States, marking a first in the country.

Process and Results of the Introduction of Carbon Capture Technology and Public Awareness Campaign

Step01

Introduction of CCUS

Innovation & Collaboration Implementation of Innovative Direct Air Capture (DAC) Technology for CCUS

- **UPA** : Installation and pilot operation of a collector (testing bed for capture effectiveness) and promotion of products and technology
- **Developer** : Carbon resource utilization from captured carbon (e.g., as cement raw material) and advancement of capture technology

* Awarded the Commissioner of the Korean Intellectual Property Office at the 2023 Invention Patent Exhibition, designated as an innovative product by the Public Procurement Service.

CCUS

Step02

Public Awareness Campaign

Public Promotion Execution of a campaign to expand awareness of carbon neutrality through the utilization of CCUS technology.

- **Online** : Posting of carbon neutrality collection-related SNS cards and quizzes
- **On/Offline** : Photo challenge for carbon collectors and stamp tours

* Campaign for visiting local tourist attractions (e.g., Jangsaengpo Whale Museum) and getting stamps (collaborating with City Management Corporation).

- Spreading CCUS Technology** Developer company : **First approval** for the installation of a carbon capture device in a US waste incineration plant

CCUS First Export Ceremony to the United States

Environmental Cleanup Activities

Initiating Environmental Cleanup Activities through Expanded Participation and Cooperation

UPA has worked to further activate environmental cleanup activities by encouraging the participation of our internal members and expanding collaboration with external partners. To draw active participation from our members, we awarded additional points in individual evaluations based on their involvement in environmental cleanup activities. Previously, participation in these activities was primarily centered around port-related organizations, but it has now been expanded to include local volunteer groups, corporations, and other entities. Furthermore, while past cleanup efforts were limited to port and coastal areas, we have extended them to key tourist sites such as Ulsan's downtown area, Grand Park, and Marine Park. As a result of these efforts, our internal participation increased by 244% compared to the previous year, and the number of local cooperative organizations grew by 18. Through the expansion of environmental cleanup activities, we aim to create a cleaner local environment and foster stronger bonds with the community.

Establishing a Resource Circulation Cooperation System

Establishing a New Win-Win Mutual Growth System

UPA has established a new mutual growth system that drives the innovative growth of collaborative companies in the port industry. With the goal of enhancing productivity and technological competitiveness, fostering innovation, and removing regulatory obstacles for SMEs, we have concentrated efforts on nurturing SMEs within the port industry. Accordingly, we have actively supported the growth and development of SMEs by promoting technological innovation among partner companies and assisting small businesses in opening new sales channels.

UPA Mutual Growth Strategy

Policy

Tasks and Goals

- Improving productivity and technological competitiveness as key elements of corporate growth
- Shifting to performance-oriented policies focused on innovation-driven growth for corporate advancement
- Identifying and removing various institutional obstacles that hinder SMEs growth

Promotional Direction

Focusing on Nurturing SMEs in the Port Industry

UPA Strategy

- Encouraging Technological Innovation Among Partner Companies
- Developing Domestic and International Sales Channels
- Improving Business Conditions Through Regulatory Enhancements

Support for SMEs in Developing Domestic and International Sales Channels

UPA has leveraged its capabilities to support domestic and international market access for partner companies, thereby establishing a stable revenue base for them. We accompanied outstanding companies in overseas investor relations (IR) events, supported their participation in international conferences, and facilitated joint overseas marketing efforts. Additionally, we have directly purchased innovative new technology products and supported SMEs in developing domestic sales channels. Thanks to these efforts, we received the highest rating in the 2023 Mutual Growth Assessment conducted by the Ministry of SMEs and Startups.

Mutual Growth

Supporting the Development of New Technologies in the Port Industry to Foster Technological Innovation Among SMEs Partners

UPA has created incentives for technological innovation among small and medium-sized partner companies. In collaboration with startups and SMEs, we have provided a foundation for these companies to innovate. Through a maritime logistics startup audition, we solicited proposals for new technologies and provided funding, space, and equipment to facilitate their development. We also offered opportunities to demonstrate these technologies at Ulsan Port, supporting commercialization and technology protection. As a result of these efforts, new technologies such as a ship surround-view system and detachable corner protection devices have been developed, with the ship surround-view system receiving the CES 2024 Innovation Award

Promotion Details for Supporting the Development of New Port Technologies

- Technological Development**
- Discovering and supporting startup technologies through maritime logistics startup auditions, Uni-Contest, new technology contests, and providing scale-up support
 - Incubation support, including startup mentoring, funding, and space provision
 - Support for 17 companies through government technology innovation programs (e.g., Smart Factory, Innovation Partnership)
 - Signing performance-sharing agreements, providing equipment and consulting to enhance productivity and stability

10 Patent Applications Related to New Port Technologies, With 30 Startups Successfully Launched

- Commercialization**
- Successful demonstration of 4 new port technologies through K-Testbed, including new monitoring procedures, pilot installations of superior products, and issuance of performance certificates
 - Joint development with partners, with 2 technologies (detachable corner protectors, AI safety helmet prototype) installed and verified at Ulsan Port

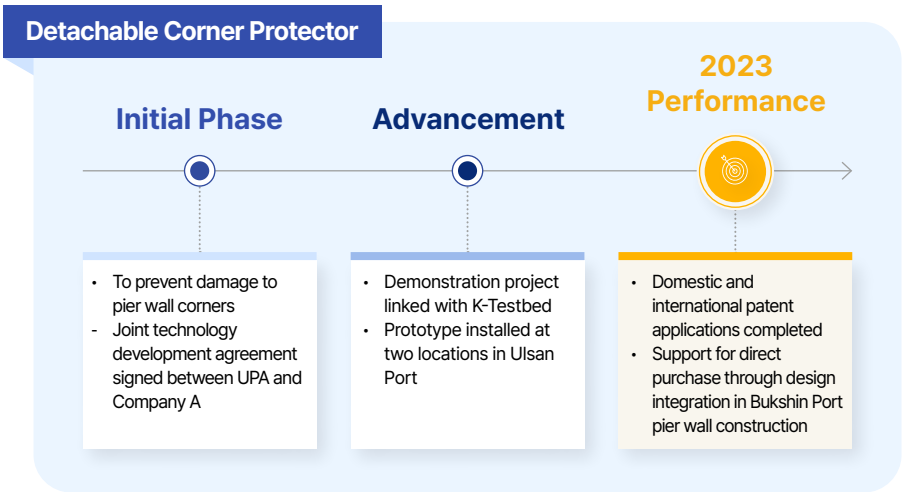

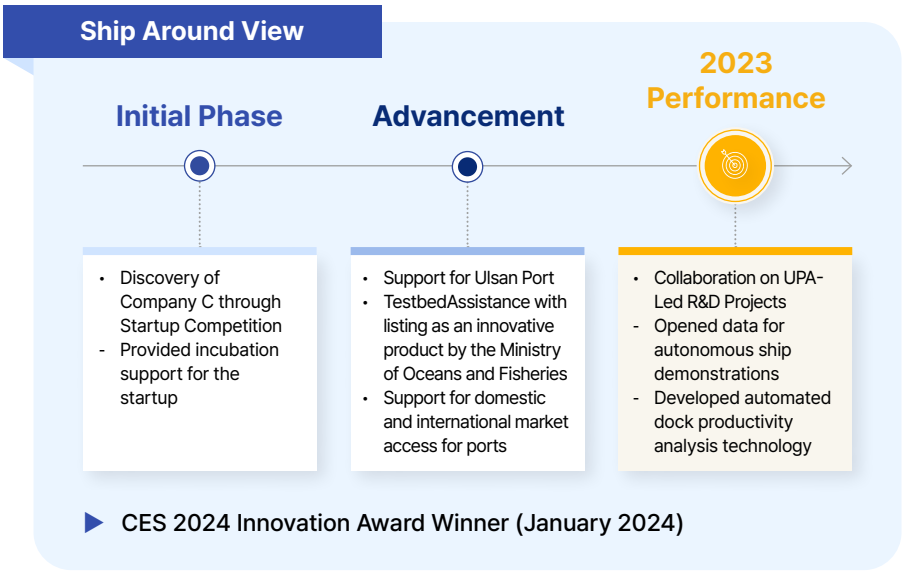

Supporting Product Commercialization Through Demonstration of New Port Technologies at Ulsan Port

- Technology Protection**
- Support for 20 cases of technology protection, including expert on-site consultations and fee assistance

Expert consultations	Technology escrow	Technology safeguarding service
On-site vulnerability assessments and optimal security solutions	Secure storage and management of technical and operational information in an independent space	24-hour security monitoring, malware, and ransomware detection

Achievement Establishing a Comprehensive Protection Framework to Prevent Core Technology Leaks

Removing Barriers to Growth for Partner Companies

UPA has actively pursued institutional and regulatory reforms to eliminate obstacles to the growth of partner companies. Through the Corporate Growth Response Center and forums with port-related organizations, we have listened to the concerns of partner companies and identified and implemented regulatory and institutional improvements. As a result, we have introduced beneficial changes, such as expanding the eligibility for combined cargo transportation and ship fuel supply services from LNG and petroleum products to include chemical products and extending the initial lease term for the distriperk from 20 years to 30 years. These improvements have made it easier and more advantageous for partner companies and port workers to conduct their business and economic activities. In recognition of these efforts, the world's first methanol bunkering project received the highest award in the "Exemplary Public Administration Case" in the across government active administration program.

Identifying and Improving Regulations and Challenges for Partner Companies and Workers

Identifying Regulations and Challenges for Partner Companies

- Corporate Growth Response Center, industry forums, and public suggestions (administrative improvement ideas)

Selecting Key Improvement Tasks

- Considering factors such as importance and feasibility of improvement

Regulatory Innovation TFT

Regulatory Verification Committee

Promoting Institutional Improvement

- Completed improvements on 3 major tasks: and

1 Government Notification

2 Internal Regulations

Target Issue	Regulatory and Challenge Issues	Improvement Item
Ship Fuel Suppliers	Limited eligibility for combined cargo transport and ship fuel supply to LNG and petroleum products, making it difficult to handle methanol (chemical product)	Expansion of Eligibility for Combined Operations in the "Notice on Coastal Shipping and Navigation" Previous Limited to LNG and petroleum products ▶ Improved Added chemical products
distriperk Tenants	Short lease terms compared to industrial complexes, causing concerns for corporate continuity and long-term investment retention	Improvement of Initial Lease Term Setting for the "Ulsan Port Zone 1 distriperk Guidelines" Previous 20 years ▶ Improved 30 years
Port Workers	Excessive restrictions on re-entry after violations of exit regulations, leading to reduced acceptance and economic activity constraints for port workers	Simplification of Re-entry Permit Criteria in the "Ulsan Port Re-entry Permit Issuance Guidelines" Previous 180 days ▶ Improved 90 days with newly established warning and disciplinary procedures

Customized Support for the Entire Life Cycle of Social Enterprises

UPA has enhanced the survival rate and self-sufficiency of social enterprises through customized support across their entire life cycle. In response to the increasing demand for market access and growth support for the sustainable development of social enterprises, we have provided nurturing and support to help them overcome challenging periods. By implementing this comprehensive, life-cycle-based support program, we have facilitated new startups, revenue growth, and job creation.

Stage-by-Stage Support and Achievements for Social Enterprises

01 | Initial Stage

Startup Support Package

- Youth F&B startup incubation utilizing local coastal seafood
- Comprehensive consulting on menu development, store location, management, and taxation
- Created 14 jobs across 7 social enterprises
- Support for reducing burden through rental of startup and training spaces

02 | Nurturing Stage

Operational Funding and Market Development Support

- Social economy enterprise expo, "Social Economy Festival"
- 33 companies participated, generating sales of 30 million KRW and creating 14 jobs
- Support for low-interest funding through mutual growth loans
- Applied a reduced interest rate of 3.98% below the market rate (for 3 companies)

03 | Growth Stage

Securing Self-Sufficiency through Capability Enhancement

- Consulting for product and service enhancement, promotional marketing
- 18 companies achieved sales of 46.43 million KRW, creating 10 jobs
- "Demo Day" for practical IR experience and strengthening investment capabilities
- Supported 45 companies with IR materials preparation and speech mentoring

04 | Collaboration Stage

Development as a UPA Business Partner

- Participation in UPA companion business model development
- Key case: Jointly promoted "Housing Environment Improvement Project for the Underprivileged," linked to re-employment of Ulsan Port retirees
- Online sales channel development with profit-sharing collaboration agreements

U:Partner*

System for the Entire Life Cycle of Social Economy Enterprises

Reduced Short-Term Expenses

Corporate Cost Savings

1.78 million KRW (2022) to 1.15 million KRW (2023)

Increased Self-Sufficiency

5-Year Survival Rate for Social Enterprises

5% National average vs 85% UPA nurtured Enterprises

Making Sustainable Results

- 27 new startups
- 5.4 billion KRW in revenue
- 41 new jobs created

*U:Partner is a branding term representing UPA's commitment to empowering social economy enterprises to grow alongside Ulsan Port, fostering enhanced growth and value.

Support Program to Enhance SMEs Productivity

UPA has implemented a support program to help SMEs adapt to future environmental changes and improve productivity. To foster manufacturing innovation among small manufacturers, we supported the establishment of smart factories and initiated customized innovation activities in the fields of safety and environment. Additionally, we provided consulting and system setup in areas such as equipment, marketing costs, and certifications. A total of 150 million KRW was invested to support 17 companies in the smart and innovation sectors, resulting in nearly 400 million KRW in financial gains, along with reductions in defect rates and operational risks.

Improving Employment Quality and Working Conditions for Partner Company Employees

UPA has improved the quality of employment and working conditions for employees of partner companies through various welfare support initiatives. We have supported programs such as the 'Tomorrow Mutual Aid Fund' and provided benefits including educational subsidies for employees' children, welfare points, and vacation allowances, helping to reduce wage disparities. Our efforts to enhance working conditions included delivering cold beverages to on-site workers during hot weather and establishing dedicated bicycle paths to facilitate workers' transportation. As a result of these initiatives, 222 employees from 74 companies have benefited in terms of employment quality. The improved working environment has also led to higher satisfaction levels and enhanced safety standards.

Development of a Digital System for Bulk Cargo Unloading Information

UPA collaborated with SMEs by providing K-Testbed opportunities to develop a digital system for bulk cargo unloading information using AI-based motion detection technology. Compared to container cargo, it has been challenging to quantify and digitize unloading information for bulk cargo such as oil and gas. To address this issue, we developed indicators that measure the productivity of unregulated bulk cargo unloading. Additionally, using AI-based motion detection technology, the movements of cranes and vehicles are monitored, and activity levels are quantified by scoring movement volume, thereby measuring the dynamics of unloading operations. By digitizing bulk cargo unloading information in this way, we have generated data for wharf productivity management and significantly improved productivity. Moving forward, we will continue fostering a digital innovation ecosystem, contributing to the establishment of a smart port.

Bulk Cargo Unloading Information Introduction

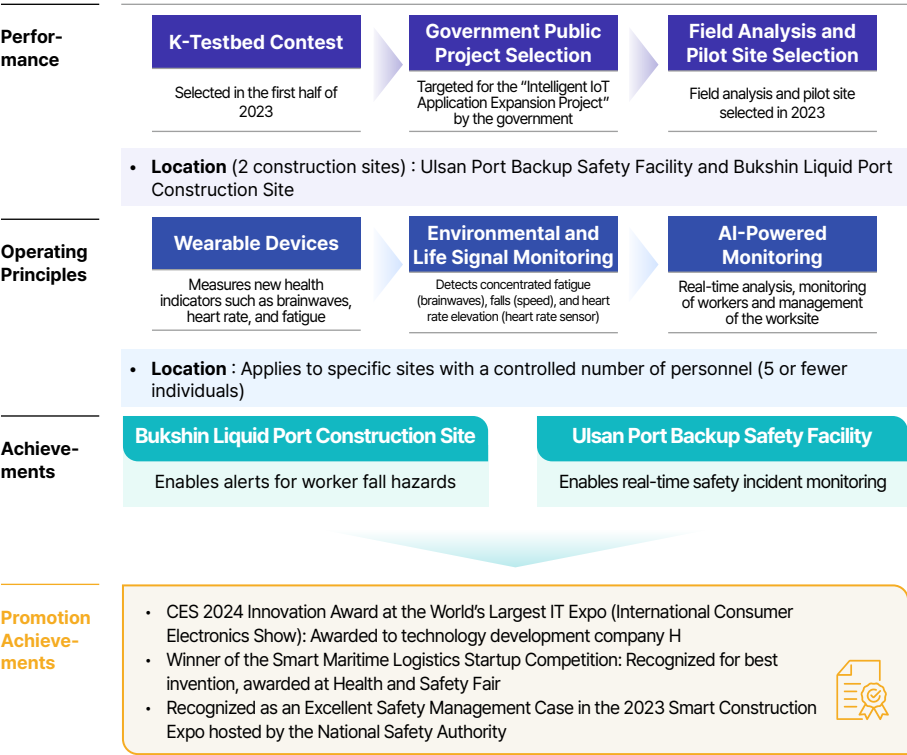

Target Setting	<ul style="list-style-type: none">Developing indicators to measure unregulated bulk cargo unloading productivityUPA directly acquires and tracks unregulated bulk cargo data, managing unloading productivity based on data		
Technology Overview	<ul style="list-style-type: none">Monitoring the movement of unloading-related units (cranes, vehicles, personnel) using AI-powered motion-sensing technology to analyze and quantify unloading operations

Expected Outcomes	<ul style="list-style-type: none">Digitizing unregulated bulk cargo information improves data generation and productivity management, significantly enhancing overall productivity		

Introduction of Smart Helmets Utilizing Worker Biometric Data

In collaboration with SMEs, UPA has introduced smart helmets that utilize worker biometric data to establish a system for accident prevention and rapid incident response. Through the K-Testbed initiative under the government's Intelligent IoT Application Expansion Project, the Authority selected smart safety helmets developed by SMEs. These helmets, as wearable devices for port workers, can detect changes in environmental and biometric signals. By applying this technology in real work environments, the Authority analyzed its functionality and monitored operational performance. With this initiative, we have enhanced the validation of SMEs technology using AI and established a foundation for achieving zero industrial accidents on-site.

Supporting New Market Development for SMEs through the Establishment of Overseas Integrated Logistics Centers

UPA aims to strengthen the competitiveness of small and medium-sized import-export companies and contribute to building a globally leading maritime logistics system by establishing additional overseas logistics centers. This initiative will facilitate logistics center access for domestic SMEs expanding into regions such as Southeast Asia, allowing them to secure logistics space at prices lower than market rates. This support will reduce logistics costs, expand distribution networks, and assist small logistics companies in entering foreign markets and developing new sales channels. Through this initiative, UPA expects to secure new growth engines for the port and enhance national competitiveness, achieving a beneficial dual impact.

Details for Establishing a Joint Corporation for the Vietnam Integrated Logistics Center

STEP 01 Business Model Revision			
Category	Initial Setup (July 2021)	1st Revision (June 2023)	2nd Revision (August 2023)
Investment Structure	30% equity, 70% external capital (UPA 80%, H Company 10%, J Company 10%)	100% equity (UPA 100%)	100% equity (UPA 80%, KCTC 20%)
Site Securing	Land secured and logistics warehouse construction		Existing logistics warehouse with long-term lease arrangement

STEP 02 Capital Structure Revision	
Addressing Cost Variability Due to Exchange and Interest Rate Fluctuations	
Existing (70% external capital, 30% equity)	Improved (100% equity)
<ul style="list-style-type: none">- Increased business risk due to exchange and interest rate fluctuations- UPA contribution fluctuated between 6-8 billion KRW (15-20%)	<ul style="list-style-type: none">- Eliminated concerns over business viability due to interest rate fluctuations- Eliminated UPA investment volatility (20% → 0%)

STEP 03 Partner Recruitment	
Selecting KCTC VINA for Their Extensive Know-How in International Logistics and Maritime Operations	
Existing (Transportation Company's role was not clear)	Improved (Dual structure with UPA and logistics company)
<ul style="list-style-type: none">- The role of shipping companies in the logistics center project was ambiguous.- Transport companies withdrew due to the lack of clear roles.	<ul style="list-style-type: none">- KCTC VINA was identified as a partner through defined roles.- UPA supported SMEs by entrusting the logistics center operation to KCTC.

Vietnam Integrated Logistics Center Construction Promotion

STEP 01 Logistics Center Remodeling Construction	
Construction managed by a high-capacity local contractor, ensuring both cost efficiency and speed.	
Logistics Center Construction Initiation	Full Operation of Logistics Center
<ul style="list-style-type: none">• Partial construction of logistics center (5,570 m²) completed• Maintaining logistics service provision for the local area during construction	<ul style="list-style-type: none">• Improved facilities and equipment, enhancing the level of logistics services

STEP 02 Support for Korean SMEs		
Acting as a strong bridge for Korean exporting SMEs		
Support Measure 01	Preferential Storage Rates and Discounts	Enlarging Logistics Business Support Scope
	<ul style="list-style-type: none">• Priority for storage areas within the logistics center and storage discounts designated for Korean SMEs	<ul style="list-style-type: none">• Expanded storage categories (general ▶ general + cold storage)• - Broadened the support scope (storage ▶ storage + transport + shipping)
Support Measure 02	Linking UPA SMEs Support Programs	Expanding Connections with External SMEs Support Agencies
	<ul style="list-style-type: none">• Linked with Ulsan distriperk company programs (automobiles, machinery, etc.)• Collaborated with large and medium-sized enterprise mutual growth programs	<ul style="list-style-type: none">• Established additional connections with public export support programs• Established a support system for exporting companies

Supporting Net-Zero for Ulsan Port Partner Companies

UPA, provided greenhouse gas emissions rights registration support in the solar power sector for Ulsan Port partner companies to establish a foundation for the growth of small and medium-sized ventures responding to climate and environmental changes. The “emissions trading system” allows companies to offset emissions through certified reductions from greenhouse gas mitigation activities, which can be exchanged for credits and sold to companies needing additional emissions rights. Through emissions rights briefings, we offered Ulsan Port stakeholders an overview of the emissions trading system, covering registration methods and real examples in sectors such as shipping, transport, construction, and industry. We also posted announcements for registration support, selected companies through internal evaluations, and completed agreements. In this way, we expanded the eco-friendly foundation toward carbon neutrality together with our partner companies.

Support for New Registration and Partner Companies' Registration for 57tCO₂ Emissions Rights

2023 Plan

- 2023 Plan** Promote self-registration of emissions rights for solar power (2 years) + recruit supporting companies for collaborative emissions registration (1 year)
- Solar Power** Register emissions rights for solar power generation, targeting a reduction in greenhouse gases for power production
- Registration Support** Conduct explanatory sessions and select companies in Ulsan Port interested in emissions registration

Implementing Efforts

Registration of Solar and LED No. 2 Facilities (Nos. 4 and 5)

Emissions Rights Explanation Session

Achievements

Completion of Independent Emissions Rights Registration

Announcement of Registration Support and Selection of Target Companies

Feasibility Analysis

Methodology Review

Evaluation and Supplements

Determine eligibility for registration

Draft project plan

On-site inspection, planning, and safeguarding

- Conduct inspections to prepare for emissions rights business registration
- Rising interest and lack of knowledge in business procedures, profitability, etc.
 - ▶ Conduct explanatory sessions for Ulsan Port collaborative companies and select support recipients

- LED** : Renewed Emission Permit Registered (81tCO₂/year)
- Solar Power** : New Emission Permit Registered (57tCO₂/year)

- Announced on website ▶ Internal evaluation ▶ Select support companies ▶ Complete agreements with selected companies by 2024 for emissions rights registration

Enhancing Safety Incident Prevention Infrastructure with Port Partner Companies

UPA has completed the establishment of the first nationwide quantified safety management system for ports through verification of the Ulsan Port unloading safety index in collaboration with partner companies. Recognizing the need for accident prevention infrastructure to create a safe workplace at Ulsan Port free from industrial accidents, we validated and enhanced the unloading safety index. Additionally, we fostered consensus among Ulsan Port partners to support nationwide expansion. As a result, we have established and demonstrated the first objective and quantifiable system for measuring and managing safety levels across all ports in Korea. Acknowledging these efforts, we received the 2023 Outstanding Case in Public Institution Health and Safety Activities and were selected as a project in the Ministry of Oceans and Fisheries' 2023 Government Innovation Implementation Plan.

Empirical Validation and Reliability Verification of Unloading Safety Index with Ulsan Port Partner Companies

Collaborative Company Joint Verification

Reliability Verification Completion

Award for Best Practices in Safety from Ministry of Employment and Labor

- Established a working group with Ulsan Port collaborative companies for the on-site index validation and advancement
- Participation of 26 pier operators

- Data analysis and correlation assessment of reoccurrence frequency by selected partner company
- Verified index reliability and shared results

- 2023 Outstanding Case in Public Institution Health and Safety Activities
- Recognized for the development of a customer-oriented safety assessment tool

Establishment of common standards and DB sharing among operators

Verification of correlation between safety index and accident rate

First quantitative safety management system established in a port

Achievements

Completion of the First Objective and Quantitative Safety Level Assessment and Management System for Ports Nationwide

Established a foundation for nationwide port expansion (selected as a project in the 2023 Ministry of Oceans and Fisheries Government Innovation Implementation Plan)

Identifying Key Initiatives for 'Local Win-win'

UPA has identified and implemented key initiatives for win-win with the local community by combining community needs with our commitment and capabilities. Amidst a challenging environment where the local economy is stagnant, and imbalances between industrial complexes and peripheral areas are worsening, we aimed to address residents' demands for improved quality of life and economic revitalization. To respond to these needs, we set a strategic direction of expanding local development and mutual growth systems linked with port logistics, and identified key mutual growth initiatives for the local community.

Local Needs and Key Issues for Local Development

Environ-mental Analysis	Local Industry Conditions	Resident Requirements	UPACapabilities
	<ul style="list-style-type: none">Stagnation in key industries such as petrochemicalsIntensifying imbalance within the local area	<ul style="list-style-type: none">Improve residential conditions and quality of lifeEconomic revitalization due to economic stagnation	<ul style="list-style-type: none">Adoption of a strategy to establish an eco-friendly energy hubContinuation of local development projects linked with industry

Promotion Direction

Expanding Local Development and Win-Win Cooperation through Port Logistics

- Key Tasks
- Securing Ulsan Port's new growth and fostering local development
 - Resolving local issues based on the participation of local community members

Pioneering the Eco-Friendly Ship Fuel Supply Market at Ulsan Port

UPA has actively addressed obstacles hindering local companies' new business ventures, thereby pioneering the eco-friendly ship fuel supply market at Ulsan Port. Although these companies aimed to transition toward environmentally friendly initiatives, the uncertainty inherent in the early stages of their projects presented significant challenges to their progress. In response, we served as a crucial link between private enterprises and the government, establishing necessary regulations and advocating regulatory improvements that were subsequently incorporated into policy. By supporting low-interest financing, facilitating investment in facility expansion, and securing preliminary demand, we alleviated the financial burden on companies and ensured the feasibility of their business pursuits. As a result, Ulsan Port was designated as an Eco-friendly Marine Fuel Supply Port, and the establishment of an LNG bunkering joint venture company (JVC) at Ulsan Port has moved toward realization. This initiative is projected to attract 91.6 billion KRW in new investments in the region, creating approximately 5,000 local jobs by 2030.

Ensuring Feasibility of Eco-Friendly Fuel Bunkering Project Through Regulatory Relief and Investment Support

Category	UPA's Role	Achievements
Regulatory Relief	Intermediary between private sector and government	<p>Established seven policies through recommendations for regulatory improvements and formulation of government-related regulations</p> <ul style="list-style-type: none">Ministry of Oceans and Fisheries: Eased compulsory pilotage requirementsKorea Customs Service: Granted fuel sales permitsNational Tax Service: Applied conditional tax exemptions
Investment Support	Alleviating the investment burden on private companies through joint investment and stable funding support	<p>Supported low-interest funding through agreements with policy financial institutions</p> <ul style="list-style-type: none">COFIX interest rate level; allowed full borrowing for project costs <p>Provided support by linking financial programs to additional investments, including the construction investment in the local tank terminal (Company H) scheduled for August 2024, and expansion of methanol storage facilities</p>
Ensuring Business Viability	Ensuring project feasibility by establishing a business model and securing demand	<p>Formed a task force (TFT) with government and shipping stakeholders to conduct the first methanol bunkering demonstration</p> <p>Secured preliminary demand for eco-friendly fuel bunkering for ships at local shipyards and in the Busan-Ulsan-Gyeongnam region</p> <ul style="list-style-type: none">Signed an MOU for eco-friendly bunkering at Dongnam Port (November 2023)

Cultivating Experts in Shipping, Ports, and Logistics and Developing Local Talent

UPA has made efforts to secure the new business and future growth capabilities of Ulsan Port by fostering regional talent in the maritime, port, and logistics sectors. We supported training programs for port and logistics-related professional certifications targeted at port workers and other employees. Through the operation of the "UPA Logistics Academy," we enhanced the expertise of stakeholders in Ulsan Port regarding port and logistics. We have been nurturing practical, interdisciplinary talent by combining maritime logistics with ICT, and by operating the "Smart Maritime Logistics Manager" certification program to develop future talents in the digital-port convergence field. Moving forward, we will continue to focus on nurturing future talent for regional development.

Conducting Certification Exams for Smart Maritime Logistics Managers

Enhancing Expertise in Maritime, Port, and Logistics and Fostering Digital Convergence Talent

Current Employees

Enhancing Expertise of Port Workers and Stakeholders

- Support for education related to port and logistics professional certifications
- 10 fields including logistics managers and international freight experts
- Operate the "UPA Logistics Academy" to foster professionals
- Provide disaster response training customized to local industries (electricity, etc.)

Future Talents

Fostering Converged Talent with Digital Expertise

- Foster practical converged talent by matching maritime logistics with ICT
- Operate and provide education for the "Smart Maritime Logistics Manager" certification system
- Provide opportunities for local youth to gain job experience in Ulsan-themed digital competencies (building quizzes, etc.)

Secured 136 port/logistics experts among Ulsan stakeholders

Secured 469 digital-port/logistics converged future talents

Promoting Seafood Consumption and Revitalizing Traditional Market Economies

UPA has revitalized the weakened seafood consumption and traditional market economy by creating a sustainable consumption environment. We operated a "Seafood Special Day" in group meals and promoted a seafood safety campaign to encourage the consumption of local seafood. Additionally, we organized various cooking classes themed around local agricultural products and ran traditional market experience programs for local children to support the traditional market economy. As a result, we were able to purchase 39 million KRW worth of local seafood, and the purchase of Onnuri gift certificates for traditional markets increased by approximately 17.9% compared to last year.

Support Project for Seafood and Traditional Market Revitalization with Sharing Packages

Promoting Seafood Consumption and Revitalizing Traditional Markets

Actively Participating in Seafood Consumption Promotion Campaign

- Operate "Seafood Special Day" for group meals, distribute seafood meal kits, and create side dish decorations to expand direct seafood consumption
- Consulting for F&B startups utilizing local seafood
- Promote seafood safety campaigns targeting visitors to traditional markets
- Increased investment in agricultural and fisheries mutual aid funds by 100 million KRW (3 times more than the previous year)

Promoted consumption by purchasing 39 million KRW worth of local seafood

Revitalizing Local Traditional Markets

- Operate cooking classes "Cook FOR U" for cooperative companies
- Promote consumption by selecting local agricultural products as main menu items
- Operate traditional market experience programs for local children
- Encourage local traditional market purchases using Onnuri gift certificates
- Organize rice cake-making events using local rice and distribute them to underprivileged groups

Onnuri gift certificate purchase performance increased by 17.9% compared to the previous year

Realizing the Value of Community Sharing and Win-win through the Opening of Facilities and Resources

UPA has opened our in-house library, sports facilities, and other convenience facilities to local residents, improving their living environment, supporting local tourism events, and assisting vulnerable groups to address welfare blind spots. By enhancing the living conditions of Jangsaengpo residents, we have improved their quality of life and invigorated the local economy through tourism attraction. We have also provided comprehensive support to those in need within the community by operating the “Happy City Meals” program for children in need, producing braille books for the disabled, and providing winter supplies for elderly people living alone. As a result of these efforts to support the community and vulnerable groups, we were recognized for our contributions to expanding cultural welfare in Jangsaengpo by receiving an Excellence Award from the Director of the National Library of Korea, and established a safety net for 2,636 households in vulnerable situations within the region.

Revitalizing Ulsan’s Peripheral Areas and Enhancing Local Social Welfare

Revitalizing Peripheral Areas

Improving the Living Environment for Residents of Jangsaengpo (a closed port) and Boosting Regional Vitality through Tourism

Convenience Facilities

UPA Open Library, sports facilities (tennis courts, futsal fields), customer lounges, summer shade canopies, and food trucks operating as convenience facilities

Educational Support

Support for Jangsaengpo Elementary School and after-school programs, operation of a mobile port class

Local Events

Operation of regional festivals (Jangsaengpo Whale Festival), shuttle bus services, and stamp tours customized to local tourism to attract visitors to Jangsaengpo

Enhancing Local Social Welfare

Resolving Welfare Blind Spots through Community-wide Support

Children

Operation of “Happy City Meals” for children in need, support for multicultural family education

570 households supported

People with Disabilities

Support for the production of braille books and travel projects for people with mobility impairments

624 households supported

Elderly Living Alone

Provision of winter supplies such as heating items and blankets, as well as emergency living funds

690 households supported

Low-income Households

Support for self-reliance programs such as self-help work and provision of nutritious food through senior centers

752 households supported

Operating the ‘Local Problem-Solving Platform’ Where Residents Identify Issues and UPA Resolves Them

UPA has contributed to creating a community-centered society by operating a local problem-solving platform where residents identify local issues, and we work to resolve them. In collaboration with Ulsan City Hall, civic organizations, and UPA, we established a cooperative system to identify and solve issues raised by local residents. By addressing the agendas that residents deemed necessary and important, we were able to come closer to the local community through joint efforts between the public, private, and corporate sectors. As a result of these efforts, public awareness of UPA increased by 5.7 points compared to the previous year in a national survey, and we achieved a score higher than the overall average for public institutions.

Organizing Citizen Participation Campaign and Participating in Community Contribution Programs

UPA engaged in joint community contribution programs for marginalized groups by launching a citizen participation campaign customized to large-scale local festivals, sharing the company’s ESG management values. Previously, we conducted campaigns independently, which limited resources and effectiveness. To improve this, we operated in conjunction with large-scale local festivals and through collaboration between the public and private sectors. Additionally, we supported vulnerable groups and veteran households by linking community contribution programs with Ulsan City, the Veterans Affairs Office, public institutions, and social enterprises. For these efforts, we received appreciation plaques in the field of social contribution from the Ministry of Patriots and Veterans Affairs, Ulsan Metropolitan City, and the Korean Red Cross

Labor-Management Relations

Labor-Management Relations that Grow Together through Trust and Communication

UPA has made efforts to establish a cooperative system between labor and management based on mutual cooperation and participation, ensuring its practical operation. In his New Year's speech, the CEO recognized the labor union as a top priority partner in the company's management, emphasizing the importance of labor-management trust and values. The chairman of the UPA Labor Union also highlighted the importance of proactive and autonomous problem-solving through communication and participation between labor and management in his inaugural address. This shared commitment led to an agreement to build a rational labor-management relationship through mutual trust and participation, and to implement labor-management relations that grow together through communication. As a result, we established and promoted eight strategic tasks for labor-management relations, creating eight performance indicators to verify the effective implementation of these tasks.

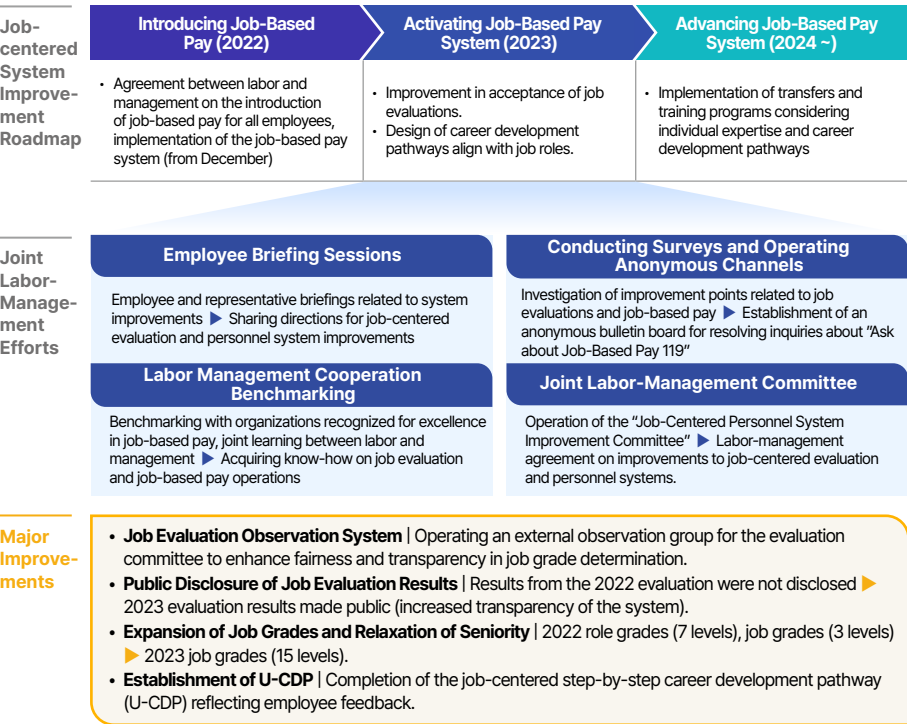

Establishing Collaborative Labor Management Relations

Elevating Job-Centered Personnel and Compensation Systems

UPA jointly worked with labor to stabilize the job-based pay system introduced for all employees in 2022. We conducted improvement meetings and surveys to identify areas for advancement, and engaged in joint benchmarking with organizations recognized for their excellence in job-based pay to ensure its more stable implementation. To achieve this, we implemented a job evaluation system, operated an external observation group for the evaluation committee, and made the evaluation results publicly available across the organization. Additionally, we expanded job classifications and established a step-by-step career development pathway centered on job roles to help the job-based pay system take root within the organization. As a result, the fairness rating of the compensation system increased by 5.2 points, and we were selected for the NCS Leaders Club for two consecutive years.

Labor-Management Relations

Responding to Legal Labor-Management Relations and Operating a Win-Win Labor-Management Council

UPA has established lawful labor-management relations by complying with laws, collective agreements, and government guidelines. During overseas business trips, we clarified working hours through an agreement on deemed working hours, ensuring that working hours for overseas trips were clearly defined. We also monitored compliance with the labor union's limits on work hour exemptions and the number of personnel used. Additionally, we operated a labor-management council to enhance mutual benefits and resolve labor-management issues, holding regular meetings to address current issues. For these efforts, we received certification as an excellent labor-management company from the Korea Management Registrar for three consecutive years.

Responding to Legal Labor-Management Relations

Introducing the Deemed Working Hours System for Overseas Business Trips	Compliance with Labor Union Work Hour Exemptions (Time-off)
<ul style="list-style-type: none">Existing Lack of clear standards regarding the recognition of working hours for overseas business trips led to confusion, as the determination of work hours varied by the circumstances of each trip.Improvements A labor-management agreement was reached, taking into account relevant case law and administrative interpretations.	<ul style="list-style-type: none">Work Hour Exemption Monitoring and compliance with exemption limits and the number of personnel using them.Paid Union Activities Pre- and post-checks of allowed hours for paid union activities (events, training, etc.) ▶ Two cases were rejected and corrected. ▶ Zero violations of the collective agreement regarding time-off and paid union activities.
Agreement on Automatic Renewal of Collective Agreement for Registered Security Guard Labor Union	Improving Compensation and Welfare Systems to Meet Public Expectations
<ul style="list-style-type: none">Situation The union's demand for negotiations came after the deadline set in the collective agreement.Collective Agreement Clause: Negotiation requests can be made up to 30 days before the expiration of the agreement.Agreement Through communication between labor and management, it was agreed not to pursue changes to the collective agreement.Automatic renewal of the petition police collective agreement (extension of validity period by 2 years).	<ul style="list-style-type: none">Establishment of Grounds for Recovery of Performance Bonuses Recovery of performance bonuses in cases of improper receipt or redistribution of bonuses.Restrictions on Recreational Facilities Access restricted for executives, employees' families, etc.Changes to employment regulations to eliminate elements of lax management.

Operating Win-Win Labor-Management Council

Labor-Management Council	Labor-Management Working Group	Registered Security Guards Council
Increasing Labor-Management Interests	Labor-Management Issue Resolution	Improvement of Working Conditions
<ul style="list-style-type: none">Held 5 meetings with 18 agenda items.All negotiation and resolution items were fully implemented within the deadlineincluding focused EAP management of stress risk groups and improvements to the annual leave savings system.	<ul style="list-style-type: none">7 labor-management meetings and occasional practical meetings.Discussed fast-track solutions for labor-management issuesincluding cost-saving measures for determining wage increase rates by position.	<ul style="list-style-type: none">Held 6 meetings (including practical meetings) with 7 agenda items.Implemented the participation of workers outside the committee in meetings,including additional provision of uniforms and safety equipment related to job transfers and the establishment of service guidelines.

Accelerating ESG Management through Labor-Management Cooperation

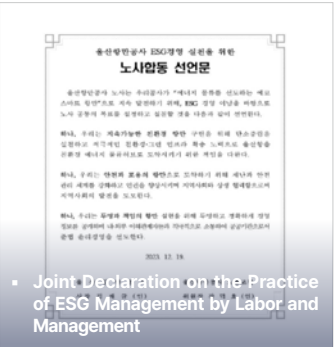

UPA has implemented company-wide ESG management activities based on labor-management cooperation for sustainable management. After collecting 21,000 used PET bottles, we produced 1,450 safety vests from the recycled materials and donated them to workers in the local port, construction, and small business sectors. Additionally, we jointly established a matching grant fund to carry out events such as children's traditional market experiences and "Happy Lunchbox" distributions, extending a helping hand to socially vulnerable groups. As a result of these efforts, our ESG Innovation Index increased by 3 points, and we were recognized as an ESG practice company in rural areas by the Korea Foundation for Cooperation of Large & Small Business Rural Affairs.

ESG Management through Labor-Management Cooperation

Sustainable Environment Protection	<ul style="list-style-type: none">Collected 21,000 used PET bottles and 4.3 tons of discarded electrical products ▶ Recycling resources and reclaiming usable materials.Conducted 14 port and maritime cleanup activities jointly by labor and management, with 282 employees participating (a 244% increase from the previous year).Assigned energy monitors per department and implemented eco-friendly campaigns (banned use of paper cups, turned off lights during lunch breaks, etc.).
Fulfilling Safe and Warm Social Responsibilities	<ul style="list-style-type: none">Established and operated a joint labor-management matching grant fund (10,000 KRW per employee per month + 10,000 KRW by UPA).Organized children's traditional market experiences, hosted the "Happy Meal Box" event, etc.Operated the "Labor and Company Café" (providing beverages to port workers during heatwaves) and installed life-saving houses for emergency support.Set up the Gender Equality Committee (conducted surveys on gender perception levels, analyzed results, and held awareness improvement campaigns).
Transparent and Law-Abiding Corporate Culture Innovation	<ul style="list-style-type: none">Revised the Code of Ethics to enhance employee awareness, with a joint proclamation by labor and management.Held three port committee-employee meetings with 48 participants and organized port committee-departmental mentoring sessions for job-related support.

Campaigning for Organizational Culture and Work Innovation Together with Labor and Management

UPA has implemented organizational culture innovation to eradicate unreasonable work practices and enhance employee satisfaction and organizational productivity through joint participation of labor and management. First, we diagnosed the organizational culture using the public organization culture diagnosis tool and the 7S model, identifying improvement tasks and encouraging participation from all departments. To improve the working culture, we discovered practical tasks for work innovation and conducted campaigns for work innovation. Through these activities, we improved the working culture, resulting in a 2.1-point increase in the work innovation index, and achieved scores of 104.2 points for family-friendly certification and 92 points for leisure-friendly certification.

Campaign for Organizational Culture Improvement Activities and 7 Proposals for Work Innovation

Achievements

- Implementation of memo reporting using the business network instead of official document reporting (170 cases)
- Transition to simplified ERP input approval instead of official documents for vacation requests, etc.
- Improvement of expenditure process (simplification from 7 to 5 steps, computerization of resolution documents)
- 8-fold increase in the use of collaboration tools to reduce meeting time (1.5 to 13.4GB)

Organizational Culture Improvement Committee

Work Innovation Campaign

Communicating with Labor and Management Together with the CEO

UPA has been striving to create a better UPA through communication and empathy between labor and management. We hosted CEO Talk Concerts where employees could ask questions in advance or on the spot, allowing the CEO to respond. This format has led to achievements such as expanded support for employee capacity building and improvements to office space. Additionally, we established the "UPA Vibrant Lounge," where discussion topics are selected through employee proposals, enabling open discussions and fostering a space for honest sharing and collective intelligence to creatively solve problems. The Authority will continue to gather employee feedback to address concerns and further develop UPA.

Bolstering Industrial Expertise

While the existing youth employment support programs were primarily focused on job training centered around the port industry, they have now been enhanced with a specialized energy logistics curriculum in accordance with our core business. By expanding the curriculum and strengthening expertise, we have made it easier for youth to find employment in the shipping and logistics industry. As a result of these efforts, the number of youth participating in the shipping and logistics expertise enhancement program increased by 28 from 2022, reaching a total of 78 participants, and the employment rate in the shipping and logistics sector achieved 55%.

Improving Treatment and Enhancing Professional Competence of Subsidiary Employees

UPA has improved the treatment of subsidiary employees and enhanced their professional competence, thereby raising the quality of employment. We implemented a 4-shift, 2-crew work system and introduced gender-specific facilities to improve employee conditions while also strengthening maritime security expertise through job training. As a result of these efforts, we achieved the highest rating in the Ministry of Employment and Labor's "Subsidiary Management Evaluation" for 3 consecutive years.

Creating Private Jobs through Key Projects and Procurement/Outsourcing

UPA has created 2,628 private jobs through port-specific jobs, local win-win jobs, and innovative jobs. By revitalizing the construction and maintenance of the Ulsan Bukshin Port and operating the distriperk area, 2,040 jobs were created. Additionally, we supported the growth of social enterprises and cooperative growth partner companies, resulting in the creation of 488 jobs. By discovering and nurturing startup companies and training smart maritime logistics personnel, we generated 100 innovative jobs. Thanks to these efforts, we were able to exceed our private job creation target of 2,545.

Private Sector Job Creation Goals

Promoting the ‘Smart Maritime Logistics Manager’ as a Part of National Certification System

UPA has initiated the elevation of the ‘Smart Maritime Logistics Manager’ certification from a private qualification to a national certification in order to create jobs by fostering logistics and ICT experts. As the automation of the port industry has rapidly progressed, job opportunities have been decreasing. To respond to this trend, we aimed to develop and support smart maritime logistics professionals to create jobs through a national certification system. We conducted consulting to stabilize the operation of the system and enhance the system’s capabilities in order to elevate it to national certification. As a result, we achieved the stabilization of the system’s operation and system advancement, meeting the national certification criteria in December 2023. We are continuously advancing the necessary procedures to elevate the Smart Maritime Logistics Manager certification to a national qualification. Only those who obtain this certification will receive additional points in the recruitment process for youth interns at the Authority. It is anticipated that the elevation of the Smart Maritime Logistics Manager certification to a national qualification will further support the development of specialized talent and job creation.

Creating Jobs in Partnership with Private Enterprises at Ulsan Port

UPA has revitalized the stagnant economy and promoted a rebound through private and region-led initiatives, creating quality jobs by leveraging the characteristics of the region’s largest industrial support port. As a result, we attracted the world’s first LNG-LPG combined power generation project and are advancing the expansion of a liquefied hydrogen plant. Additionally, we transformed the logistics warehouse at Dock 6 from general merchandise to automobile transshipment, securing transshipment volumes for 1,000 electric vehicles. Through these efforts, we have directly employed 815 people and generated employment for 56,020, thereby strengthening the sustainability of job creation at Ulsan Port.

Attracting New Private Business Projects in Ulsan Port and Creating Future Jobs

Expanding Job Sharing with Flexible Work Arrangements

UPA has improved work efficiency and expanded job sharing by implementing flexible work arrangements. By alleviating long working hours, we have secured hiring capacity and created new jobs using the labor cost savings from the wage peak system. Additionally, we have ensured vacation for shift workers to expand senior job opportunities and collaborated with relevant departments to increase employment for vulnerable groups. As a result of these efforts, despite the overall reduction in workforce, we were able to hire an additional 51 employees by operating various work arrangements, and we provided job experience opportunities for job seekers through record-high youth intern recruitment.

Job Creation through Improved Working Arrangement

Improving Working Arrangement	Improvement of Work Patterns to Address Long Working Hours	Activation of Work during Pregnancy and Childcare
	<ul style="list-style-type: none">Concurrent utilization of flexible work and working hour selection systemUtilization rate: 91.3%Secured hiring capacity of 3 people	<ul style="list-style-type: none">Increased use of shortened work for pregnancy and childcare support183.5% increase compared to the previous year100% hiring of substitute personnel
Job Sharing	Connection of New Hires to Wage Peak System	Expansion of Senior Jobs through Improved Shift Work
	<ul style="list-style-type: none">Simultaneous application of reduced working hours and flexible workUtilizing labor cost savings to link new job creation	<ul style="list-style-type: none">Staffing to Ensure Leave for Shift Employees' VacationHiring of Senior Maritime Control Experts

Key Achievements

- Despite workforce reduction, additional hiring of 51 people through various work arrangements (achieving 42.1% of the workforce)
- Expansion of job experience opportunities through record-high youth intern recruitment (from 23 to 30 people, achieving 24.8% of the workforce)

Efforts in Social Equity Employment for High School Graduates, Local Talent, People with Disabilities, and Low-Income Groups

UPA has worked to align with the government's national goals of creating a warm and happy society by expanding the recruitment of youth, local talent, and vulnerable job seekers. For youth and high school graduates, opportunities such as internships and vocational training were provided to facilitate entry into public service. For local talent, job experience opportunities and career mentoring were offered. As a result, interns were hired as regular employees or found employment in other public enterprises. Additionally, the employment rate for veterans continues to rise, and the mandatory employment rate for people with disabilities exceeded the target by 122%.

Creating Jobs by Managing the Gap Between Employment Quota and Current Workforce

UPA recognized the need to secure the capacity to create new jobs by analyzing vacancy factors and implementing workforce reassignment and efficiency improvements for proactive hiring within the workforce limits. As a result, we enhanced the operation of our vacancy management system and established measures to prevent vacancies. Additionally, through a precise vacancy-filling process, we achieved the lowest vacancy rate and the highest filling rate ever recorded. Moving forward, the Authority will continue to focus on early detection of job opportunities through detailed vacancy analysis to expand direct employment within the organization.

Expanding On-Demand Hiring Based on Precise Vacancy Analysis

Goal

Due to government policies(a 4.7% reduction in authorized positions and non-approval for staff increases in new projects), there is a reduction in available T/O for new recruitment. It is necessary to analyze the factors contributing to these vacancies and expand the foundation for job creation through workforce reallocation and efficiency improvements.

Advancement of Vacancy Management System Operations

- Monitoring: Predicting trends in leave and resignation vacancies over the next 5 years
- [Regular] Periodic demand surveys for regular leave and honorary retirement, and monthly monitoring of workforce status
- [As needed] Continuous review of vacancies longer than 6 months (due to childcare, mid-term resignations, etc.)
- Variable control: Mandatory submission of advance notice for long-term leave
- *Substitute personnel can only be hired upon submission of advance notice
- Recruitment expansion: Filling vacancies with the largest number of hires ever (4 times)

Establishment of Measures to Prevent Vacancy Occurrence

- Strengthening monitoring of employees planning to leave
- Conducting pre-interviews, analyzing reasons for resignation, and identifying improvement tasks
- Variable control: Building an organizational culture that respects work-life balance
- Innovations in work, diversification of work methods, and expansion of EAP operations
- Extension of employment: Extension of contract period if substitute personnel are desired
- Existing: Employment ends upon expiration of the original contract period, even if the leave period is extended
- Additional acceptance: Status of reserve candidates maintained for 4 months

Vacancy Filling Process

Monitoring Vacancy Status

- Basic vacancies: 3
- Workforce change: increased 6
- Predicted retirements: 3
- Additional capacity: 6

Determining Recruitment Scale

- Total number of regular hires in 2023: 6

Timely Recruitment

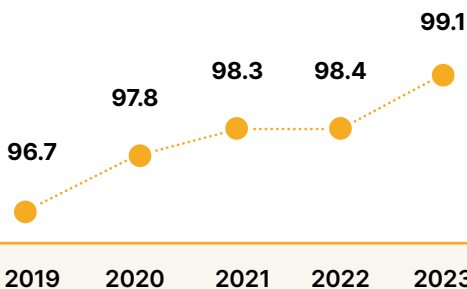

- New employees: 4
- Experienced hires: 1
- Contract employees: 1
- Substitute personnel: 3

Key Achievements

- Achieved the highest ever filling rate of 99.1%
 - an increase of 0.7% compared to the previous year
- Maintained a filling rate of over 96% for five consecutive years
 - average for other public institutions in 2023: 92.4%
- Actively discovered hiring capacity, resulting in the recruitment of 6 new regular employees
 - 5% of total workforce

Trends in Filling Rate Over the Last 5 Years

(Unit :%)

Safety Management

Establishing a Port Safety Management System Through Internal and External Environmental Analysis

UPA analyzed the external environment, which emphasizes the safety role of cargo handling areas due to the implementation of the Port Safety Special Act, as well as the internal environment reflecting the CEO's commitment to prioritizing disaster and safety as core management values. As a result, a port safety management system was established. Strategies were developed and implemented to strengthen safety levels at cargo handling areas and build an inclusive safety net. Through this targeted port safety management, there have been no serious accidents for five consecutive years.

UPA Port Safety Management System

Goal	Eliminating Safety Blind Spots in the Port to Achieve Comprehensive Safety in Ulsan Port		
Mid-to-Long Term Roadmap	Short Term (2023-2024)	Mid Term (~2026)	Long Term (~2030)
	Proactively establishing a safety management system led by UPA	Supporting self-regulation and safety management system development for port operators	Internalizing safety awareness among port operators and establishing a self-managed safety system
Strategy	Bolstering Safety Levels at Cargo Handling Areas	Building an Inclusive Safety Net	Ensuring Safety at Facilities and Construction Sites
Tasks	<ul style="list-style-type: none">Demonstrating and enhancing a quantifiable management system for cargo handling safety levels	<ul style="list-style-type: none">Concentrated improvement and management of three major safety incidentsComprehensive heat illness mitigation activitiesEstablishing a safety passage network for workersImproving mental health according to work types	<ul style="list-style-type: none">Developing safety helmets using AI technologyProviding safety support for small construction sitesStrengthening the risk information provision systemTimely maintenance and reinforcement of aging facilities
Monitoring	Weekly/Monthly Performance Review Meetings) <ul style="list-style-type: none">Weekly: Management monitoring meetingsMonthly: UPA roundtable discussions	Internal and External Committees <ul style="list-style-type: none">Operating safety committees linked to the "Port Safety Special Act" and the "Industrial Health and Safety Act"	Internal and External Collaboration Systems <ul style="list-style-type: none">External: Maritime Safety Belt (19 organizations)Internal: Disaster Safety Task Force (TFT)

Reducing Industrial Accidents Through Focused Management of Three Major Safety Incidents in Small Workplaces

UPA analyzed the types of accidents in small cargo handling operations over the past five years to identify the most common incidents. We were determined that the most frequent accidents were overturns, falls, and collisions. To prevent the recurrence of these incidents, efforts were made in safety inspections, facility improvements, and training and experiential learning. As a result, the occurrence of the three major safety incidents in Ulsan Port decreased by 37.5% compared to the previous year.

Focused Management of 3 Major Safety Incidents

Category	Identifying 3 Major Safety Incidents Through Accident Analysis by Type in Small Cargo Handling Operations Over the Last 5 Years					
	1st Priority Overturn(20.2%)		2nd Priority Falls(18.7%)		3rd Priority Collisions(14.5%)	
<div>Safety Inspections</div> <div>Number of Workplaces: 66</div>	<ul style="list-style-type: none">Adjusting load for forklifts exceeding cargo loading limitsResolving drainage issues and ground level differences		<ul style="list-style-type: none">Enforcing wearing safety equipmentRepairing and maintaining safety facilities attached to cargo handling equipment		<ul style="list-style-type: none">Placing guides for forklifts with poor visibility and installing rear sensorsEnforcing the wearing of safety helmets and safety shoes	
<div>Facility Improvements</div> <div>Total Project Cost: 258 million KRW</div>	<ul style="list-style-type: none">Improving brightness for three lighting towers to prevent nighttime obstaclesInstalling anti-tipping facilities for cargo handling operations		<ul style="list-style-type: none">Expanding fall prevention equipment for cranesPurchasing new smart airbags		<ul style="list-style-type: none">Installing new auxiliary CCTV for cranes to eliminate accident blind spotsInstalling new speeding warning and monitoring equipment	
<div>Safety Training</div> <div>Safety Personnel: 65</div>	<ul style="list-style-type: none">Educating on prevention methods by accident type- Producing and distributing card news and posters		<ul style="list-style-type: none">Fall experience at sea and cargo handling facilities (VR)Experience the effectiveness of wearing safety equipment (on-site)		<ul style="list-style-type: none">Experience training for trailer collisions and other scenariosExperience the effectiveness of wearing reflective tape (on-site)	

Achievement

Occurrence of Three Major Safety Incidents in Ulsan Port Decreased by 37.5% Compared to the Previous Year (8 ▶ 5 cases)

Developing and Improving a System for Quantifying Unloading Safety Levels

UPA has paved the way for a nationwide unloading accident prevention system by empirically validating the unloading safety index developed in 2022. The unloading safety index is a comprehensive quantification system for unloading safety levels, designed to proactively manage unloading companies with inadequate safety levels by applying weights based on diagnostic indicators to calculate safety ratings. To stabilize the system, we have applied and analyzed field data from Ulsan Port over two years, starting in 2021, to verify reliability. Through the development of this unloading safety index, we have received recognition for changing the paradigm of unloading safety management from proactive prevention to post-incident response, including awards such as the "Outstanding Case in Public Institution Health and Safety Activities" from the Ministry of Employment and Labor, the "International Port Association Sustainability Awards," and the "Government Innovation Implementation Plan" by the Ministry of Oceans and Fisheries.

Empirical Validation of Unloading Safety Index

Development of Unloading Safety Index ('22)	Empirical Validation of Unloading Safety Index	Standardization of Unloading Safety Index
Development of safety factors and formulas	Verification of reliability through application and analysis of field data	Expansion of application to national trade ports

P | Unloading Safety Index Empirical Validation Plan

- (Index Diagnosis) Pre-validation of reliability is necessary before the official field application of the initially developed index
- (Method) Confirming the operability of the index through the application and empirical validation of Ulsan Port unloading data → Establishing implementation strategies and detailed tasks (schedule)

D | Collection of Raw Data From Ulsan Port Unloading Companies

- Establishing a data collection cooperation system
- Launching a working group to collect highly reliable data from unloading companies
- Establishing and providing data preparation guidelines
- Maximizing convenience for unloading companies in providing data

구분	회사명	연락처	비고
1	한국해양공사	010-1234-5678	한국해양공사
2	한국해양공사	010-1234-5678	한국해양공사
3	한국해양공사	010-1234-5678	한국해양공사
4	한국해양공사	010-1234-5678	한국해양공사
5	한국해양공사	010-1234-5678	한국해양공사

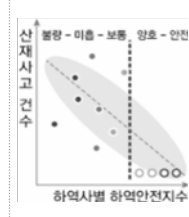

A | Sharing Results and Improvement Efforts

- (Index Diagnosis) Pre-validation of reliability is necessary before the official field application of the initially developed index
- (Method) Confirming the operability of the index through the application and empirical validation of Ulsan Port unloading data → Establishing implementation strategies and detailed tasks (schedule)

C | Data Analysis and Result Derivation

- Consultation with Experts (Korea Port Training Institute)
- Analysis of the correlation between unloading company safety ratings and accident occurrence → (Verification) Confirmed that no safety accidents occurred for unloading companies rated 'Safe' or 'Good' in 2022

Key Achievements

Leading the paradigm shift in unloading safety management from proactive prevention to post-incident response, gaining recognition both domestically and internationally

01 Won the "Outstanding Case in Public Institution Health and Safety Activities" Award from the Ministry of Employment and Labor (first port to do so)

* Received the Minister of Employment and Labor Award

02 Achieved double awards at the International Port Association (IPA) '2024 Sustainability Awards'

- Only institution to win awards in two categories (Climate Energy and Health Safety)
- Green Methanol and Biodiesel Supply Project for Container Ship Fuels
- Development Project for Ulsan Port Unloading Safety Index

* Competing against 401 projects from 161 ports in 65 countries.

03 Selected as a project for the Ministry of Oceans and Fisheries' "Government Innovation Implementation Plan" in 2023

(1-3. Development and Implementation of Unloading Index)

Heat Illness Free with a Heatwave Prevention Measure

UPA has implemented comprehensive heat illness prevention measures for port workers amid record heatwaves caused by the climate crisis. We have promoted various strategies to prevent or reduce heat-related illnesses, such as heat stroke and heat exhaustion, including safety inspections of workspaces and rest facilities, heat illness prevention campaigns, beverage support trucks, and providing heat refuge areas. As a result of these efforts, we have reported zero cases of heat illness at Ulsan Port, even during the recent heatwave that saw the highest number of cases in the country over the past five years.

Heatwave Response Measures Performance

Category	On-Site Safety Inspections	Raising Safety Awareness	Heat Reduction Support
Performance	Conducting Workplace Safety Inspections <ul style="list-style-type: none">Monitoring compliance with basic heat illness precautionsChecking workers' health status before and after work	Heat Illness Prevention Campaign <ul style="list-style-type: none">Distribution of promotional materials for heat illness guidelines and operation of banners	Operation of Beverage Support Trucks (2 Units) <ul style="list-style-type: none">Increased beverage support by adding one truck for smooth beverage delivery during heatwave hours (10 AM to 5 PM)
	Inspection of Break Areas for Port Workers <ul style="list-style-type: none">Checking the normal operation of air conditioningInspecting/restoring break area damages	Providing Safety Information on Heat Illnesses <ul style="list-style-type: none">Provision of training materials and self-safety inspection checklists from the Occupational Health and Safety Agency	Providing Heat Refuge Areas <ul style="list-style-type: none">Improvement of worker rest conditions through the expansion of consumer-centered shade shelters (11 units)

Work-Specific Mental Health Programs to Prevent Worker Mental Injuries

UPA has implemented customized programs to improve and promote mental health based on different work types, including security, field, and office positions. For security personnel, we modified the shift system to reduce physical fatigue from early morning shifts and alleviate work-life balance stress. For field workers, we provided one-on-one customized counseling to diagnose and address job-related stress through consultations. For office workers, we offered mental health solutions for employees at high risk of stress during a mental care expo. Through these diverse initiatives, we have made significant efforts to prevent mental injuries caused by stress among our workers.

Efforts to Improve and Promote Mental Health by Employment Type

Category	Security Personnel	Field Workers	Office Workers
Diagnosis of Current Status	Improvement of Long Working Hour Practices <ul style="list-style-type: none">Complaints of frequent early morning shifts and work-life balance stress due to the 4-shift, 3-crew system	Worker Support Program <ul style="list-style-type: none">Diagnosed and identified high-risk stress groups among 589 port workers	Mental Care Expo Operation <ul style="list-style-type: none">Diagnosis of job stress levels and identification of major factors for employees
Improvements	<ul style="list-style-type: none">Results of pilot operation of 4-shift, 2-crew system through labor-management agreement: 94% employee satisfaction ▶ Decision to formally implement and operate (from 2024)	<ul style="list-style-type: none">Contract with a professional counseling company (EPA field)Implementation of one-on-one customized counseling for high-risk stress groups (142 individuals)	<ul style="list-style-type: none">Mental Care Expo (11 Programs)Providing mental health improvement solutions for high-risk employees

Providing Support for Safety Labor Costs at Small Construction Sites to Achieve Zero Accidents

As the number of small construction sites within Ulsan Port has increased, the risk of industrial accidents has also risen. To reduce this risk, UPA has provided support for safety labor costs at small businesses, in addition to Health and Safety services and labor services. Small construction sites often struggle to hire safety managers due to budget constraints. However, with the establishment of a labor cost support plan, they were able to employ safety managers. As a result, despite the increase in small construction sites, no industrial accidents have been reported at these sites.

Health and Safety Services (2021)		Labor Consulting Services (2022)	Existing Services + Special Support (2023)
Basic inspections, work-related illnesses, training		Provision of labor and legal consultation, solutions	Support for safety labor costs at small businesses * In the case of UPA, no legal obligation for safety labor cost support
Performance	Identifying Risk	Establishment of a Labor Cost	Labor Cost Support (39 million KRW)
	Shortage of safety managers due to budget limitations at small sites	Benchmarking of best practices from other institutions and legal advice from experts	Employment of one safety manager * Verification of fund usage through post-settlement

Providing Hazard Information Directly to Construction Workers

UPA has upgraded the safety levels at construction sites by directly providing hazard information to construction workers. Previously, hazard information was indirectly provided through site managers or only focused on specific risks at the construction site, resulting in workers being aware of only fragmented aspects of the dangers or recognizing them slowly. However, by directly delivering risk assessment information to construction workers, we have been able to convey a broader range of information more quickly, which has helped enhance the safety awareness of construction workers.

Change in the Method of Providing Hazard Information to On-Site Workers

Category		Existing	Improvements
Achievements	Diversification of Information Channels	• Adoption of an indirect provision method through site managers (Site Manager ▶ Construction Workers)	• Direct Client (UPA) ▶ Construction Workers • Indirect Site Manager ▶ Construction Workers
	Diversification of Hazard Information	• Hazard information limited to construction sites, leading to insufficient awareness of specific hazards unique to piers.	• Pier Hazardous factors include dangerous goods, handling equipment, etc. - Construction Site Hazardous information such as underwater diving and concrete pouring.

Old Facilities Made New Again! Comprehensive Safety for Facilities

UPA has assessed the safety levels of aging facilities, identifying those that require improvement. A reinforcement plan was established for six locations, including the grain terminal, and new technologies were applied to maximize safety effectiveness during repair and reinforcement work. Through thorough management of aging facilities, despite a high proportion of facilities over 30 years old, all facilities have achieved a good rating in precise safety inspections for six consecutive years.

Safety Inspections Process and Aging Facilities Repairment

Precise Safety Inspections of Facilities	Selection of Aging Facilities Needing Improvement	Completion of Repair and Reinforcement Work
- Safety level assessment focused on aging facilities	- Establishment of reinforcement plans for six locations, including the grain terminal	- Application of new technologies to maximize safety effectiveness

■ Signing of MOU with Designated Emergency Maintenance Contractor

Advanced Disaster Management System through Disaster Environment Analysis

With the increase of complex and large-scale disasters, along with changes in the industrial sector due to the climate crisis and carbon neutrality, new types of disasters are emerging. In response to this situation, UPA is analyzing the disaster environment, enhancing our capabilities to respond to complex and large-scale disasters, and proactively preparing for new types of disasters, thereby advancing our disaster management system. By equipping ourselves with the capability to respond to new and complex disasters, we achieved the highest rating in the National Safety Korea Training Evaluation” and became the only port in the country designated as an Eco-friendly Marine Fuel Supply Port by establishing comprehensive safety measures for different types of ship fuels.

UPA Disaster Management System

Goals

Establishing a Management System for New and Complex Disasters to Realize a Safe Port that Can Be Used with Confidence

Strategy

Reinforcing Response Capabilities for Complex and Large-Scale Disasters

Proactive Identification and Preparation for New Types of Disasters

Tasks

- Conducting joint drills assuming complex and large-scale disasters
- Realizing rapid and accurate disaster response centered on the field

- Establishment of safety measures for disasters and accidents by type of ship fuel
- Construction of joint management and response system for electric vehicle fires

Disaster Management

Prevention	Preparation	Response	Recovery
<ul style="list-style-type: none">Identification and assessment of disaster factorsEstablishment of collaboration systemDisaster incident training	<ul style="list-style-type: none">Revision and improvement of action manualsStockpiling and sharing of disaster resourcesJoint drills with relevant agencies	<ul style="list-style-type: none">Support for the removal of floating debrisDisaster identification and initial responseOperation of emergency response headquarters	<ul style="list-style-type: none">Activation of cooperation system with relevant agenciesInspection and analysis of affected facilitiesEmergency repairs of key facilities

Cooperation System

Disaster Safety Countermeasure HQ	Safety Management Committee	(Self) Emergency Response Headquarters	Emergency Rescue Control Group
Government/Local Governments	Ulsan Maritime Affairs and Fisheries Office	UPA	Marine Police, Fire Department, etc.

Achievements

Proactively Securing Response Capabilities for New and Complex Disasters to Become the Highest-Level Disaster Safety Port in the Country

- Achieved “Excellent” (Highest Rating) in the “National Safety Korea Training Evaluation” through a large-scale joint drill involving 17 agencies and 450 personnel from the public and private sectors.
- Designated as the “Eco-Friendly Marine Fuel Supply Port” (the only one in the country) by establishing comprehensive safety measures for different types of ship fuels.

Minimizing Damage through Field-Centered Disaster Safety Capabilities

UPA is minimizing damage by swiftly responding to natural and social disasters with our field-centered disaster safety capabilities. Previously, the security personnel in charge of dock security responded to disasters from the security situation room. Now, we have transformed the security situation room into a disaster safety field situation room, allowing all employees to proactively inspect and respond to disasters and accidents from the outset. By enabling all employees to respond quickly to natural and social disasters, we have achieved zero casualties, and we received the highest rating of “Excellent” in the “Emergency Support Agency Capability Assessment” by the National Fire Agency.

Rapid Response System for Natural and Social Disasters

	Detection and communication of signs	On-Site Inspections and Situation Assessment	Activation of the Emergency Response HQ
Natural Disasters (Typhoon)	<ul style="list-style-type: none">Identifying typhoon signs and tracking of its pathActivation of internal and external communication and cooperation systems	<ul style="list-style-type: none">Emergency response centered on the field situation roomEstablishment of a typhoon response plan	<ul style="list-style-type: none">A total of 31 personnel across 4 teams centered around the CEOMaintaining port control and emergency response readiness
Social Disasters		Fire on Moored Vessel at Dock 7	Hazardous Material (Sulfuric Acid) Spill at Dock 4
	Aware	Initial situation awareness and communication from the situation room, on-site deployment	Receipt of worker reports and situation communication, on-site deployment
	Identify	Access control and emergency support for disaster resources	Participation in access control and rescue team situation meetings
	Follow-up	Role of on-site liaison and support for fire suppression and recovery	Suspension of vessel entry at docks 3-5

Joint Civil, Government, and Public Sector Training Simulating a Complex Disaster

UPA conducted joint drills involving public, private, and governmental agencies based on the assumption of complex disasters, thereby securing top-level response capabilities. As disasters tend to become more complex and larger once they occur, we deemed it necessary to train practically with relevant agencies to respond effectively. In consultation with relevant agencies, we assumed simultaneous complex disaster scenarios and conducted drills twice a year. Through these drills, we immediately addressed deficiencies and widely shared best practices. As a result of our efforts, we achieved the highest rating of “Excellent” in the “National Safety Korea Training Evaluation” and received the Minister of the Interior and Safety Award. Additionally, we were recognized with a Ministerial Commendation in the field of maritime safety management from the Ministry of Oceans and Fisheries and obtained certification as an “Outstanding Disaster Reduction Enterprise” by the Ministry of the Interior and Safety.

	Improvements Complements	<ul style="list-style-type: none">Improvement measures for inadequacies in Ulsan Port on-site manual (8 types)	

Comprehensive Safety Measures for Different Types of Ship Fuels

UPA has secured comprehensive safety measures for various types of ship fuels to position Ulsan Port as the country's only Eco-friendly Marine Fuel Supply Port. Due to the high carbon emissions from traditional oil-based ship fuels, we are transitioning to eco-friendly fuels that reduce or eliminate carbon emissions. Accordingly, we have established different safety measures based on the characteristics of these fuels to prepare for disaster situations such as fires and explosions during operations. As a result of these efforts, we have been designated as an Eco-friendly Marine Fuel Supply Port by the Ministry of Oceans and Fisheries and received the “Exemplary Public Administration Case, Grand Prize” in the across government active administration program for successfully conducting the world's first green methanol bunkering. We will continue to make every effort to ensure the safe expansion of low-carbon and zero-carbon fuel supply.

Safety Issues and Improvement Achievements by Ship Fuel Type

Human Rights Management

Establishing a Systematic Human Rights Management System

UPA has established a systematic human rights management system through the concretization of human rights management tasks. We have set key objectives focusing on strengthening the human rights management system, internalization and advanced monitoring, and sharing and spreading human rights values, and we have detailed specific tasks accordingly. We have established a normative framework and dedicated organization for human rights management, and through continuous monitoring, we are striving to become a leading organization that respects human rights and listens to human values.

Human Rights Management Initiatives

Human Rights Vision	A Leading Organization in Respecting Human Rights and Listening to Human Values		
Key Objectives	Strengthening the Human Rights Management System	Internalization and Advanced Monitoring	Sharing and Spreading Human Rights Values
Detailed Tasks	<ul style="list-style-type: none">Establishment of a master planStrengthening of dedicated organization and raising awareness	<ul style="list-style-type: none">Employee training and campaignsEnhancement of human rights impact assessment	<ul style="list-style-type: none">Protection of stakeholder human rightsPromotion of human rights for vulnerable groups in the community

Integrating Proactive Recommendations from the Human Rights Commission to Enhance the Management System

UPA has proactively incorporated recommendations from the National Human Rights Commission to establish a foundation for respecting human rights and has enhanced its management system. We have identified the direction and agenda of the Human Rights Commission's management approach and reflected these proactively in our regulations, strengthening the dedicated organization by including external experts in the Human Rights Management Committee. Additionally, our CEO has led campaigns and training sessions to prevent workplace harassment and sexual violence.

Efforts to Establish a Foundation for Respecting Human Rights

Improvement of Planning Procedures		Reinforcing of Dedicated Organization	Raising Awareness
<ul style="list-style-type: none">Immediately reflected recommendations from the National Human Rights Commission		<ul style="list-style-type: none">Included external experts in the Human Rights Management CommitteeStrengthened independence through regulatory amendmentsOperated committees for gender equality and subsidiary management	<ul style="list-style-type: none">Conducted CEO-led campaigns to prevent workplace harassment and sexual violenceAchieved 100% completion of preventive training for all employees
Existing	Human Rights Commission ▶ Ministry of Justice ▶ UPA		
Improvement	Proactive Incorporation by UPA		

Creating a Healthy Work Environment for Body and Mind

Recently, incidents related to malicious complaints, such as verbal abuse from clients, have been occurring frequently in public institutions. To protect our employees from potential malicious complaints, UPA has ensured that all staff complete 100% of the training on responding to malicious complaints. We are also running programs for psychological treatment to help alleviate employee stress. We have also established the right for victims to be accompanied during grievance procedures and strengthened protective measures for victims. As a result of these efforts, we have seen a 5% increase in satisfaction with grievance handling and improved 18 safety risk factors.

Initiatives to Promote Respect for Employee Human Rights

Psychological Protection	Protected employees' mental health	Complaint Prevention	Achieved 100% completion of training on responding to verbal abuse
<ul style="list-style-type: none">Provided anonymous stress assessments and one-on-one counselingOperated Employee Assistance Programs (EAP) including resilience training for employees		<ul style="list-style-type: none">Inserted employee protection messages during phone callsStrengthened security by verifying the identity of outsiders	
Complaint Handling	Increased satisfaction with complaint handling by 5% (score of 92.3)	Safety Protection	Improved 18 safety risk factors
<ul style="list-style-type: none">Established the right for victims to be accompanied and abolished unofficial handling procedures to enhance protective measures and improve the professionalism of counselors		<ul style="list-style-type: none">Conducted comprehensive inspections for hidden cameras in restroomsEvaluated and improved office safety risks	

Enhancing Human Rights Impact Assessment Through Feedbacks

UPA is utilizing the results of the previous year's human rights impact assessment to enhance our indicators, enabling the implementation of increasingly advanced human rights impact assessments each year. The results of the current year's human rights impact assessment are reviewed and approved by the Human Rights Management Committee, ensuring a continuous feedback process.

Feedback on Human Rights Impact Assessment Results

Results Feedback (March-April)		Human Rights Impact Assessment		Deliberation and Feedback (for the following year)	
Feedback	Incorporation of previous year's results	Evaluation Method	Joint assessment with external experts	Deliberation	Review and approval by the human rights management committee (including scholars, professors, and stakeholders)
		Management	Excellent (96.6 points)		
Improving Indicators	Improvement of 9 items (5 new, 3 deleted, 1 modified)	Main Business	Excellent (95.8 points)	Feedback	Enhancement of the human rights impact assessment major project checklist

Developing Strategies to Prevent Digital Human Rights Violations

UPA has developed measures to prevent digital human rights violations in line with the spread of AI technology. We operate a personal information checklist to ensure that personal data is collected and destroyed properly, and that only authorized personnel can handle biometric information. We have also created accessibility features to make our website user-friendly for people with disabilities and the elderly. Thanks to these efforts, we have received the highest rating for personal information management from the Ministry of Oceans and Fisheries for five consecutive years and have been certified for web accessibility by the Ministry of Science and ICT for eight consecutive years.

Digital Rights Protection Measures

Digital Rights Protection Measures	Responding to Advanced Technologies such as AI	Strengthening Personal Data Self-Determination Rights	Guaranteeing Information Access Rights
	<ul style="list-style-type: none">Implemented AI-driven human rights protection for personal dataOperated checklists (for collection, disposal, remediation, etc.)	<ul style="list-style-type: none">Established grounds for handling biometric informationConducted inspections on personal data management and disposal practices	<ul style="list-style-type: none">Operated accessibility features on the website for people with disabilities and the elderly (e.g., alternative text)
Achievements	[Ministry of Oceans and Fisheries] Received the highest rating for personal data management for 5 consecutive years	Achieved 100% completion rate for personal data training	[Ministry of Science and ICT] Achieved 8 consecutive years of web accessibility certification

Fostering a Respectful Society for Diverse Community Members

UPA has worked to ensure that diverse members of the community, such as people with disabilities, military personnel, children, and low-income individuals, can lead lives that are respected. We have supported the installation of facilities for people with disabilities, provided assistance and braille signage, allocated budget for CCTV installation in military bases, and supplied learning kits to children. These efforts to support the rights and welfare of marginalized groups in the community have been recognized, and we received an award from the Mayor of Ulsan for our social responsibility in the field of human rights.

Customized Human Rights Protection for Diverse Members

Category	People with Disabilities	Military Personnel	Children	Low-Income Individuals
Tailored Human Rights Protection	<ul style="list-style-type: none">Ensured basic rights by supporting facilities for individuals with hearing impairmentsGuaranteed safe mobility rights through the installation of braille signage and the renovation of tactile paving	<ul style="list-style-type: none">Supported the budget for installing CCTV within military facilities to address blind spots in human rights protectionEnhanced the welfare of military personnel through the provision of fitness facilities	<ul style="list-style-type: none">Guaranteed the right to education for children in fishing villages through after-school educational support, including learning kits (school supplies, books, etc.) and science experiments	<ul style="list-style-type: none">Ensured stability in life through the employment of North Korean defectors and multicultural familiesProtected the basic rights of over 2,000 households through the provision of winter supplies and meal support

Upholding Human Rights to Support the Mental Health of Port Workers

The surge in COVID-19 endemic blues has highlighted the need for human rights protection that also addresses the mental health of port workers. As part of this initiative, we conducted safety inspections at the workplace, improving 315 risk factors, and provided counseling support for 142 port workers. We secured safe bicycle lanes to facilitate safe mobility and renovated rest facilities to ensure that workers can comfortably exercise their right to rest. Our efforts to meticulously protect the human rights of port workers have been recognized, and we received an "Outstanding Case in Public Institution Health and Safety Activities Award" from the Ministry of Employment and Labor.

Protecting Mental Health of Port Workers

Right to Life	Improved 315 Risk Factors	Fundamental Rights	Provided Counseling Support for 142 Port Workers
<ul style="list-style-type: none">Conducted safety inspections and operated safety conferencesProvided 100% personal protective equipment to workers		<ul style="list-style-type: none">Support program for mental health guardians for workersOperation of beverage trucks to provide comfort for workers	
Right to Move	Ensured Safe Pathways for Movement	Right to Rest	Ensured Right to Rest Comfortably
<ul style="list-style-type: none">Secured safe bicycle lanes throughout the entire port areaEstablished 55 parking spaces and introduced a designated parking system		<ul style="list-style-type: none">Renovation of rest facilities and construction of accessible pathwaysRenovation of shower facilities and replacement of boilers	

Talent Management

Efficient Organizational Management for Driving Performance During Internal and External Crises

UPA has established and implemented an operational plan for its organization and human resources in accordance with its management strategy. With the vision of becoming an “Eco-Smart Port Leading Energy Logistics” and a defined management strategy, we have operated a customized organization capable of responding to current issues in a timely manner. Under the principles of “concentrating specialized capabilities for future projects,” “enhancing the efficiency of core port operations,” and “ensuring stable organizational management,” the Authority operates in a way that contributes to generating management performance.

UPA Organizational Operating Plan

Vision	Eco-Smart Port Leading Energy Logistics			
	Eco-Friendly Energy Infrastructure	Safe and Smart Port	Public Institution Efficiency	
2040 Management Goals	New Business Revenue Share 30%	Cargo Volume 280 million Tons	Debt Ratio Below 20%	U-ESG Index S Grade
Strategic Direction	Leading Energy Logistics Port	Strengthening Competitiveness in Attracting Customers	Enhancing Management Efficiency	Practicing Sustainable Management
Management Environment	<ul style="list-style-type: none">- Internal Environment: Concerns about a decline in cargo volume in 2023 after a rebound in 2022; need for enhanced port safety and increased productivity- Policy Environment: Ministry of Oceans and Fisheries promoting the development of “High-Value Smart Ports” and advancing “Overseas Logistics Centers” in accordance with national policy tasks- Industry Environment: Shipping market recession, acceleration of the transition to eco-friendly energy, and intensified competition among ports			
Implications	Need for Establishing Next-Generation Eco-Friendly Ship Fuel Supply Chains	Enhancing Port Safety and Productivity Focused on Core Functions	Leading Government Policies Through Management Efficiency	
Focus Areas in Organizational and Human Resource Management	Concentrate Specialized Capabilities for Future Projects	Enhance Efficiency of Core Port Operations	Stable Organizational Management	
	<ul style="list-style-type: none">• Lead in bunkering eco-friendly ship fuels (methanol, LNG, etc.)	<ul style="list-style-type: none">• Actively utilize port big data• Quantify cargo handling safety levels	<ul style="list-style-type: none">• Minimize organizational restructuring• Operate TFTs for current issue response	

Stable Organizational Management on Organizational Restructuring

UPA has made efforts to operate the organization stably after the restructuring in December 2022. By maintaining stability in the restructured organization, we have facilitated the achievement of company-wide management goals. As a result of these efforts, revenue from new businesses increased by 2.3% compared to the previous year, reaching 12.8%, and cargo volume achieved 98.7% of the target at 193 million tons. We exceeded our goals by obtaining a ‘B0’ rating on the U-ESG index. Moving forward, we will continue to ensure stable operations of the restructured organization to drive the achievement of our management objectives.

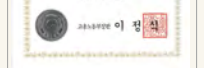

P Organizational restructuring as of December 2022	D Ensure stable organizational operation in 2023	C,A Establish organizational improvement measures in 2024
Reduced from 12 to 11 departments - optimized work allocation by readjusting department roles and responsibilities.	Contribute to achieving company-wide management goals through stable operation of the restructured organization.	Minimize organizational restructuring and operate TFTs for current issue response.

Category	Restructuring (December 2022)	Achievements
Report Line	Disaster Safety Office	<ul style="list-style-type: none">• Disaster safety : Conducting joint disaster training with public and private sectors, and hosting the only port safety conference in the country• Future projects: Establishing the company's first overseas project, the “Vietnam Integrated Logistics Center Joint Venture (K-UPA VINA)”• Cargo volume: Conducting 110 port sales meetings from CEO to staff• Eco-friendliness: Designated as the only port in the country for eco-friendly marine fuel supply by the Ministry of Oceans and Fisheries.

Achieving Management Performance Through Specialized Organizational Operations

As the internal and external environments change, such as in areas like environmental safety and the digitalization of logistics processes, we have often identified corresponding urgent tasks. For example, we have identified tasks such as the use of eco-friendly ship fuels, the development of objective diagnostic indices for port safety levels, and the establishment of a map-based port service platform. UPA has formed and operated a specialized organization to develop and manage these initiatives. Through this organizational operation, we have achieved significant results, including the world's first successful bunkering of green methanol-biodiesel, winning the Grand Prize at the Ministry of Employment and Labor's Health and Safety activities presentation contest, and launching the PortWise app, the first map-based port service platform in the country.

Identifying Current Issues and Operation of Specialized Organizations

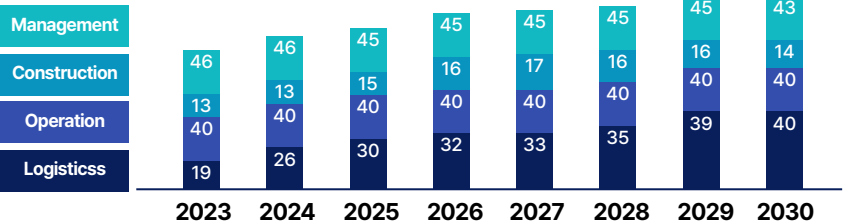

Category	Current Issues/Obstacles	Operation of Specialized Organizations	Achievements
External Collaboration (Public-Private)	<ul style="list-style-type: none">Strengthen decarbonization regulations in the international shipping sector due to climate crisis.Lack legal basis and examples for the use of eco-friendly ship fuels.	<ul style="list-style-type: none">Foster public-private collaboration with an agile organization.Establish and operate the "Methanol Bunkering TFT."Successfully legislate "Port Leadership," conduct risk assessments, and attract bunkering companies.	<div>World's First Successful Bunkering of Green Methanol-Biodiesel</div>
	<ul style="list-style-type: none">Increase the need for objective diagnosis and feedback on port safety levels.Encounter challenges in securing private raw data with no similar cases or research results.	<ul style="list-style-type: none">Quantify safety with the "Ulsan Port Cargo Handling Safety Index" and establish a "Public-Private Working Group" for demonstration.Involves private sector (26 pier operators and 29 safety managers), government (Ministry of Oceans and Fisheries), and UPA.Promote the expansion of a representative safety index for national ports.	<div>Awarded Grand Prize at the Ministry of Employment and Labor's Health and Safety Activities Presentation Contest in 2023</div> <div>Contributing to Zero Serious Accidents at Ulsan Port</div>
Internal Collaboration	<ul style="list-style-type: none">Digitalize global port logistics processes and address competitive challenges.Face difficulties in securing private data and the lack of integration with CIQ (Customs, Immigration, Quarantine) data.	<ul style="list-style-type: none">Establish and operate the country's first map-based port service platform, "PortWise TFT."Build an integrated information platform connecting weather information, vessel tracking, and port facilities to achieve real-time hyper-connectivity among port users.	<div>Government Collaboration with 580 million KRW Investment, Commercialization of Platform</div> <div>Establishing Optimization Foundation for Port Operations such as Productivity, Berthing Time, and Dwell Time</div>

Establishing a Mid-to-Long Term Human Resource Management Plan Considering Job Expertise

UPA has determined the appropriate number of personnel for each business and job unit and has established a mid-to-long term human resource management plan. In the first half of the year, we developed this plan by considering the business volume, budget size, and current staffing situation for each project. In the second half of the year, we will differentiate roles and responsibilities by job unit and select the appropriate number of personnel needed for each department, allowing us to roll the human resource management plan. This approach enables us to place personnel in the most suitable positions, maximizing management performance.

Developing and Rolling the Mid-to-Long Term Human Resource Management Plan

First Half | Establish a mid- to long-term human resource management plan considering business volume, budget size, and staffing situation by project

Second Half | Distinguish roles and responsibilities by job unit and estimate appropriate staffing levels for each department, rolling the human resource management plan

Staff Estimation	Estimate required staffing levels by job roles and responsibilities
Adequacy Review	Review adequacy of staffing estimates based on department structure and personnel quotas
Confirmation	Confirm appropriate staffing levels by job roles and responsibilities
Operational Check	Monitor compliance with appropriate staffing levels during role assignments
Plan Rolling	Rolling Mid-to-Long Term Human Resource Management Plan

Revised HRD Goals and Tasks to Achieve the 2030 Management Goal

UPA has determined that to achieve the 2030 management objectives, it is essential to secure capabilities for future business initiatives, actively support self-development and career development, and internalize tailored leadership at all levels. Therefore, we have developed an HRD strategy focused on enhancing capabilities for new businesses and future growth, establishing a system for cultivating job experts, and actively training future innovative leaders. To implement this strategy, we are advancing more systematic training plans and operations, individual capacity development and practices, competency assessments, and training evaluation methods.

UPA HRD Goals and Tasks

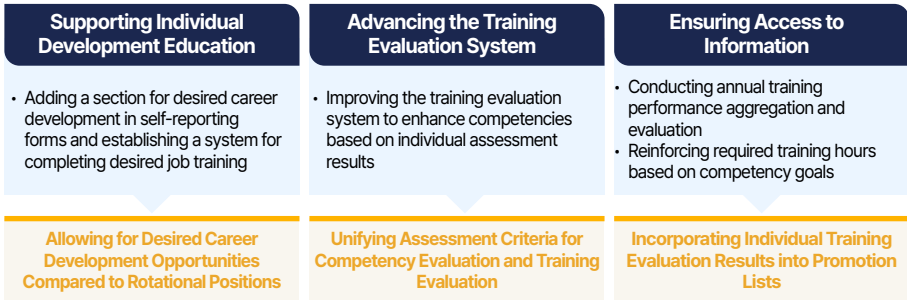

(As of Q1 2024)

Enhancing Training Effectiveness and Operating Field-Centered Port Logistics Expert Training

UPA has established a system where employees can indicate their desired career development areas in their self-reporting forms and complete job-specific training to enhance training effectiveness. We also have improved the training evaluation system to allow for the enhancement of identified competency gaps based on individual competency assessment results. In addition to this self-directed training approach, we have developed and implemented tailored training courses for port logistics experts that align with field requirements. As a result, we have achieved excellent ratings in both practical application and training satisfaction.

Advancing Training Effectiveness through Strengthened HRD-HRM Linkages

Field-Centered Port Logistics Expert Training

Category	Customized Trainings	Achievements
Understanding New Business Opportunities at Major Domestic Ports	<ul style="list-style-type: none">Collaborated with four port authorities to conduct a total of four relay on-and-off training sessions on shipping and ports	Raising understanding of new business opportunities at major ports and enhancing networking
Ulsan Port Introductory Course	<ul style="list-style-type: none">Implemented a total of four basic training sessions on port logistics, port operations, and port construction using in-house instructor	Securing core basic competencies for UPA employees
Ulsan Port Expert Course	<ul style="list-style-type: none">Conducted a total of eight field-centered Ulsan Port Expert courses, combining education and discussion-based learning	Enhancing planning and implementation capabilities for new growth and future business
Port Industry Networking Program	<ul style="list-style-type: none">Held a total of four UPA Logistics Academy sessions, including global shipping, port, and logistics training	Knowledge sharing and networking among port logistics practitioners

Enhancing Fairness and Transparency in the Recruitment Process and Post-Hiring Personnel Management

UPA has made efforts to improve the fairness and transparency of personnel management throughout all stages of the recruitment process—before, during, and after hiring. Before recruitment, we established a Recruitment Culture Innovation Crew to shift from a recruitment agency-centered process to a culture with which candidates can resonate. During the hiring process, we implemented blind recruitment to eliminate biases against applicants and strengthened the verification of job competencies to select “high-performing talents.” To ensure that selected candidates are not discriminated against based on their educational background or hiring type, we have improved the treatment of high school graduates and addressed disparities compared to regular employees, thus leading personnel management fairly and transparently. As a result of these efforts, we received the “Prime Minister’s Award” at the Human Resources Innovation Best Practice Competition and have been certified as a Fair Recruitment Excellence Institution for five consecutive years.

Before Hiring | Recruitment Culture Innovation Crew

01

Listening to Applicant Feedback

Focusing on Key Experiences to Understand the Journey

Analyzing survey results from last year's recruitment processes

02

Checking Touchpoints (MOT)

Analyzing the Flow of the Applicant Journey

Extracting key moments of truth (MOT) based on employee application experiences and reviewing related systems

03

Addressing and Resolving Improvement Tasks

Identifying Weak points for Each MOT

Operating focus group interviews (FGI) to identify improvement tasks

04

Reconfirming with Applicants

Conducting Experience Surveys by Recruitment Process

Analyzing the results of improvement measures and feedback from surveys

Adjustment in Cover Letters Submission

- Existing | no evaluation of cover letters for all applicants
- Improved | limiting evaluation to those selected for interviews

Expanded Information Disclosure

- Existing | only the passing score for written exams was disclosed
- Improved | providing score and feedback reports by type when announcing written and interview results

Achievements

- Applicant satisfaction with recruitment increased by 2.3%
- From 85.8 points in 2022 to 87.8 points in 2023
- Implemented the disclosure of reasons for disqualification in connection with government projects

During Recruitment | Excluding Bias Through Blind Recruitment and Expanding Job-Specific Competency Verification

Reinforcing Job Competency Verification

Category	Existing
Resume Screening	<ul style="list-style-type: none">Submission of application forms (cover letters)Unable to assess job competencies and experience
Written Exams	<ul style="list-style-type: none">Job competency assessment (50 questions / 60 minutes)Job competency assessment failure rate: 8.9%
Interview	<ul style="list-style-type: none">Conducted lecture-style training for interviewersFormed interview panels centered around managementConducted competency, discussion, and presentation interviewsEach interview lasts 45 minutes per person

Achievements

- Additional submission of cover letters and experience/career descriptions to help assess job experience and serve as reference material for competency interviews.
- Expanded job competency assessment time (from 60 to 70 minutes), with a job competency assessment failure rate of 4.4% (a 50% decrease compared to the previous rate).
- Conducted role-playing during interviews and provided individual feedback.
- Expanded participation of practical staff in interviews (an increase of 20.8% compared to the previous year).
- Competency, discussion, and presentation interviews with AI added to strengthen job competency verification (interview time increased from 45 to 100 minutes).

New Design and Implementation of Career Development Path (U-CDP)

UPA has newly designed and implemented a step-by-step career development path (U-CDP) centered around job roles for all employees. By analyzing each employee's job type and job description, we introduced a job-centered career development path utilizing classification-specific roles and provided related training. The process is divided into job experience stages, career planning stages, and career development stages, allowing employees to explore or receive recommendations for suitable training courses to become experts in their fields. Through this process, we enhanced the professionalism of current job roles and were able to present career development guidelines for our employees.

Methods and Examples for Designing Career Development Paths

CDP Designing Methods	Analysis of Series Types			Analysis of Job Descriptions			Design of CDP					
	(Review of Job Series Types) A total of 6 job series classifications → Design career development paths by series			(Review of Job Types) A total of 44 job classifications → Design development paths utilizing classified jobs			Introduction of Job-Centered Career Development Paths → Provide training aligned with job roles and career					
Job Series	Office Administration		Taxation & Accounting		Safety		Environment		Construction		IT	
Examples of Career Development	① Job Experience		② Career Planning Stage							③ Career Development Stage		
	Entry Level (Staff)		Intermediate Level (Junior to Manager)							Senior Level (Deputy General Manager and Above)		
	When Assigning Port Environment Tasks		CASE 01 When Assigning Port Environment Tasks		CASE 02 When Assigning Port Operations Tasks		CASE 03 When Assigning Port Logistics Tasks		When Assigning Port Environment Tasks			
	Port environment job performance → Support for specialized job training → Opportunities for exploring IDP		(Job Correspondence) Perform environmental tasks → [CDP] Complete port environment training → [IDP] Desired job exploration training (desired training in port operations, logistics, etc.)		(Job Transition) Perform operational tasks → [CDP] Complete port operations training → [IDP] Complete desired job training (recommendation to complete port environment training)		(Job Transition) Perform logistics → [CDP] Complete port logistics training → [IDP] Complete desired job training (recommendation to complete port environment training)		Implement intensive management for the development of port environment experts - Support for environmental expert training

Achievement

Enhancement of Current Job Expertise and Presentation of Employee Career Development Guidelines (Goals, Directions, etc.)

Work-Life Balance

Creating a Work-Life Balanced Workplace

UPA has implemented flexible work schedule adjustments tailored to individual circumstances, ensuring a balance between work and life by utilizing personal leave and promoting a PC-OFF system that encourages focused work during working hours to alleviate long working hours. We have maintained the Family-Friendly Management Certification for nine consecutive years and, in 2024, became the only public institution to receive the Minister of Gender Equality and Family's commendation for "Merit for Family Friendly Policy," establishing ourselves as a representative public institution that exemplarily operates family-friendly systems.

Work-Life Balance Programs and Achievements

Ensuring Personal Leave Usage	Strengthening the PC-OFF System	Creating a Flexible Work

Minister of Gender Equality and Family's commendation for "Merit for Family Friendly Policy"

"Merit for Population Policy" by the Minister of Health and Welfare

Continuous Childcare Support and Improving Working Environment

We recognize that addressing the low birthrate issue is essential for maintaining the sustainability of our nation, and we have established a 'childcare-friendly workplace culture' through various systems. We allow pregnant employees to work up to 2 hours shorter each day and support up to 3 years of parental leave per child. We also provide childcare leave and up to 2 hours of paid childcare time for school events or medical appointments. Our efforts to foster a family-friendly organizational culture through childbirth encouragement and childcare support systems have been awarded "Merit for Population Policy" by the Minister of Health and Welfare.

Parenting Support Programs and Achievements

Category	Details
Pregnancy and Childbirth Stage	Reduced Working Hours Allowing pregnant employees to work up to 2 hours shorter each day
	Check-Up Leave Provision of fetal check-up leave by pregnancy trimester
	Maternity Leave Use of parental leave (self: 90 days, spouse: 10 days)
Child-Rearing Stage	Childcare Leave 3 years of leave per child (with service recognition) / Actively encouraging male parental leave and childcare leave
	Care Leave Care leave provided for school events, medical appointments, etc. (up to 3 days of paid leave per year)
	Childcare Time Provision of paid childcare time for children under 5 years old (2 hours per day, up to 24 months)
Growth and Maturity Stage	Family Relationships Hosting programs to expand family communication and cultural enrichment - family-friendly workplace education, parenting mentoring, terrarium experience, cultural days, etc.
	Children's Career Program for developing children's proper career values and communication
Key Achievements	Paid Childcare Time 2022: 719.5 hours 2023: 2,466 hours
	Childcare Leave 2022: 28.9 days 2023: 56.8 days
	Family-Friendly Activities 2022: 205 people 2023: 401 people

Establishing and Operating a Personal Data Management System

As interest in personal data protection has increased recently, the importance of personal data protection has risen, and the scope of management within the organization has also expanded. Therefore, it has become necessary to strengthen the personal data management system and raise awareness of personal data protection. In response, we revised the personal data protection guidelines and conducted a comprehensive survey of the status of personal data files. As a result of establishing and operating the personal data management system, we achieved a B rating in the personal data management level assessment and have maintained an average level above the standard for five consecutive years in the evaluation of personal data management practices.

Personal Data Management System and Achievements

01 | Revision of Personal Data Protection Guidelines

- System Establishment : Revised regulations to reflect legal amendments
- New provisions for disclosure of entrusted contents, protection measures for biometric information* and mobile video surveillance equipment
- * Information that can identify individuals through biometric data such as fingerprints and iris patterns

02 | Conducting a Comprehensive Survey

- Current Status Check : Comprehensive survey of personal data file holdings
- Conducted a comprehensive survey on the status of holdings, including purpose, duration, legal basis, and responsible person information, to manage systematically

04 | Stability Assurance Measures

- Protective Measures: Ensuring stability through self-inspection
- Embedding security awareness among employees through monthly self-inspections
- Including checks for unaddressed personal data encryption in information security audits to verify the possibility of data breaches

03 | Strengthening Education and Promotion

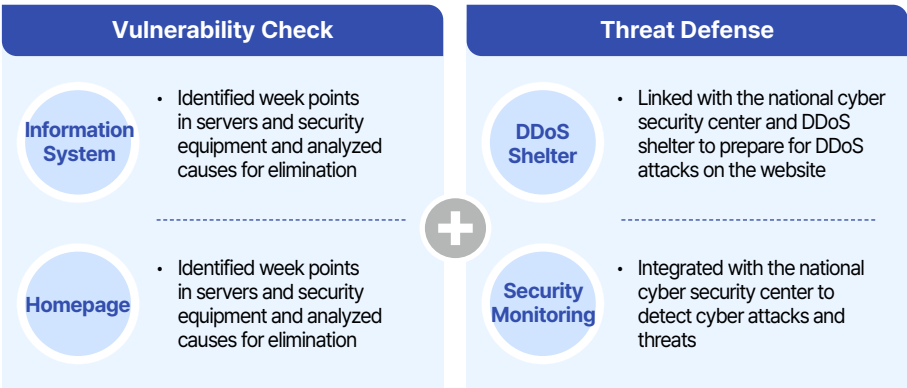

- Awareness Raising: Customized training for different target groups
- Conducted tailored training for responsible persons (CPO), staff members, and contractors to enhance learning effectiveness
- 2022: 135 participants completed training → 2023: 228 participants completed training

Compliance Rate for Personal Data Protection Act	Evaluation of Personal Data Management
Personal Data Files Existing: 83% ▶ Improvement: 100%	Maintaining Top Level for Five Consecutive Years: 100%
Personal Data Processing System Existing: 97% ▶ Improvement: 100%	Achievement Rate for 53 Inspection Items

Efforts and Achievements for Cyber Safety

UPA has made efforts to prevent cyber crises and strengthen its response capabilities. With the increased use of data through information systems, there is a potential for numerous security incidents; therefore, we have reinforced vulnerability checks and defensive mechanisms to prevent cyber crises. Additionally, we found that collaborating with multiple agencies is more effective than acting alone in preventing cyber crises. As a result, we established a joint response system and discussed cooperation measures through information security councils and workshops with relevant organizations, including public institutions in Ulsan, four port authorities, the National Intelligence Service, and the Ministry of Oceans and Fisheries, thereby enhancing our cyber security capabilities.

Reforming Operational Directions to Build Board-Centric Responsible Management

The Board of Directors (Port Committee) of UPA aims to enhance its substantive role, advance the responsible management system, and strengthen management partnerships centered on participation and communication. Based on these goals, the Board actively engages in the overall management of the company.

Board of Directors Operational Directions

Strengthen BOD Operations	Enhance Management Oversight Functions	Activate Field Communication Management
<ul style="list-style-type: none">Reassess the BOD's operational processesIncrease the effectiveness of management recommendations and participation in current issuesMake BOD activities publicly accessible	<ul style="list-style-type: none">Establish internal control governanceManage and improve organizational risks both internally and externallyExpand monitoring of subcommittees and specialized committees	<ul style="list-style-type: none">Expand communication among members and establish a worker observation systemEnhance organizational capabilities based on expertiseStrengthen institutional status by building external networks

Improving Board Operations Monitoring

UPA has strengthened the functions of the Board of Directors and improved the monitoring system through a phased approach to issue management and a rapid response system. By conducting regular reviews and improvements of the board's performance indicators, we are enhancing the effectiveness of the board's operations.

Improvement Cases for Poor BOD Indicators

Expanding Subcommittee's Roles and Activities

UPA is operating specialized subcommittees to facilitate in-depth decision-making on specific management issues, and we are expanding the activity areas of these subcommittees. By leveraging the expertise of our non-executive directors, we are enhancing management participation. This active involvement of our board of directors is not only improving management efficiency but also serving as a key element in realizing responsible management within our organization. Moving forward, we will continue to robustly support our board's management participation and enhance management transparency through the activation of subcommittees.

Improving Board Communication Management Based on Field Engagement

UPA has strengthened field engagement to foster a sense of unity among our members and share specialized know-how, thus enhancing communication management. Our board led on-site meetings with Ulsan port businesses, established partnerships with other port authorities, and conducted benchmarking visits to international ports. Additionally, we implemented tailored professional mentoring and lectures, along with a worker observation system, to communicate with all generations of employees based on their situations and needs. As a result of these proactive communication activities grounded in field engagement, our satisfaction score for board operations reached an all-time high of 98.4, while our self-assessment of board activities maintained a top-level score of 97.9.

Establishing Internal Control Governance

UPA has recently established a tailored internal control system, taking lessons from significant corruption cases in public organizations, including large-scale embezzlement and disasters. Our internal control system is a differentiated, institution-specific control system that emphasizes cooperation, collaboration, and communication based on complementary roles among the first, second, and third lines of defense, aimed at overcoming the limitations of a small organization. We have focused on diagnosing areas that could have significant financial, social, and legal impacts in the event of an accident, identifying core risks that are priorities for our management. Subsequently, through a profiling framework for these risks, we have specified risk types, major risk cases, and control methods, thereby enhancing the effectiveness of our risk management. By establishing a culture of internal control that is preventive and effective on a daily basis, we aim to become a public institution that is more trusted by the people.

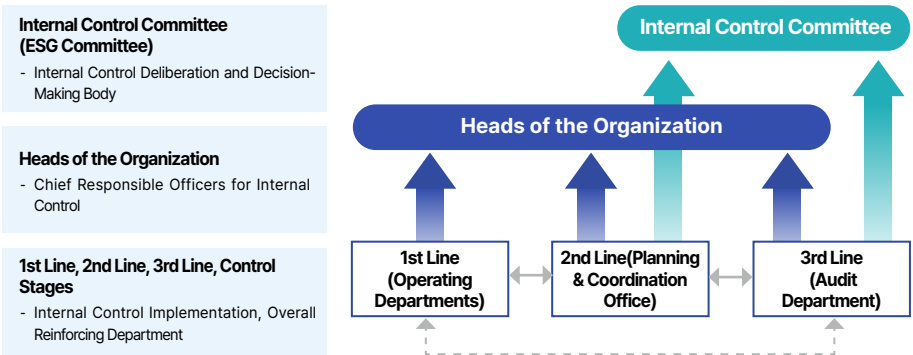

Improvements After Implementing the Internal Control System

Category	Existing	Improvements
Responsible Department	Audit Department (Preventive Audit), Individual Task Owners	Led by the Head of the Organization, Involving All Departments
Control Line System	2 Line System (Operational Departments, Audit)	3 Line System(Established an Overwatching Organization)

Level5(very high)	20~25		

A System for Reinforcing Integrity

UPA has achieved a “triple crown” in ethical management by receiving commendations for outstanding public service from the Board of Audit and Inspection, winning the Grand Prize in the Integrity Content Contest from the Anti-Corruption and Civil Rights Commission, and being recognized as the best institution in the Public Service Management Evaluation by the Ministry of Oceans and Fisheries. As a leading institution in ethical management, we have worked to maintain this spirit of integrity by restructuring our integrity system to prevent any potential corruption or unethical incidents. Consequently, we have enhanced the robustness of integrity through strengthening internal controls, internalizing integrity, increasing transparency, and eliminating conflicts of interest.

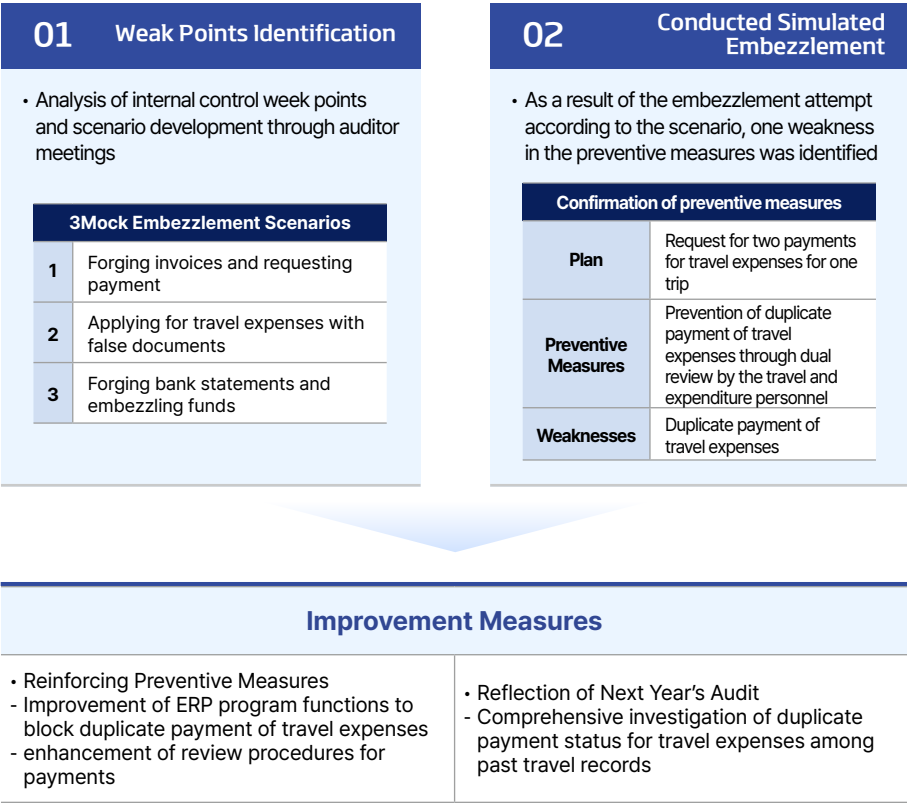

UPA Integrity Strengthening System

Internal Control System Inspection through Simulated Embezzlement Attempts

UPA assessed the adequacy and effectiveness of its internal controls by targeting week points. First, three embezzlement scenarios were developed, and as a result of the attempted embezzlement, one deficiency was identified. Consequently, we established improvement measures to ensure that similar incidents do not occur in the future. Through these proactive risk management and preventive measures, there have been no instances of corruption over the past 13 years.

Identifying Week points and Preparing Improvement Measures Through Simulated Embezzlement Attempts

Ethical Management

Enhancing the Reporting System and the Effectiveness of Disciplinary Actions

UPA has established a stronger ethical management system through the activation of the reporting system and enhanced the effectiveness of disciplinary actions. We conducted training on procedures to follow when witnessing corruption and how to use the reporting system, making it easier for individuals to report incidents. By extending the statute of limitations for sexual violence disciplinary actions, we ensured that perpetrators face harsher penalties. As a result of these efforts, we achieved a 10% increase in awareness of the reporting system, reaching 98%, and proactively introduced the Integrity and Ethical Management Compliance of the Anti-Corruption and Civil Rights Commission.

Penalty Regulations & Reporting System

Activating of the Reporting System	Reinforcing Ethical Standards	Operation of Strict Penalty Standards
<ul style="list-style-type: none">• Training for reporting witnessed corruption• Education on the use of the reporting system for new employees• Conducting a reporting experience campaign for employees	<ul style="list-style-type: none">• Collection of pledges from the Audit Results Review Committee• Implementation of term limits and conflict of interest criteria for the Ethics Management Committee, along with enhanced disqualification grounds	<ul style="list-style-type: none">• Extension of the statute of limitations for sexual violence disciplinary actions (from 5 to 10 years)• Reinforcing regulations for the recovery of improperly received benefits• Establishment of regulations to restrict employment for stalking crimes
98% Awareness of the Reporting System (10% Increase) 35% Increase in Perceived Effectiveness	5.4% Increase in Audit Acceptance 6% Increase in Perception of Fairness	Proactive Introduction of Anti-Corruption and Integrity Management Compliance (K-CP)

SELF-Initiatives to Enhance Integrity Awareness

UPA has implemented SELF initiatives to enhance integrity awareness, encouraging employees to participate directly and experience the efforts firsthand. Inspired by the integrity-themed activities involving reporting, eating, listening, and feeling, we conducted training, campaigns, the production of integrity songs, and sessions with professional instructors. As a result, the perception of executives leading by example improved by 17%, and satisfaction with integrity training rose to 93%, an increase of 4% compared to the previous year, indicating a shift in employees' awareness of integrity. Additionally, we were recognized as an excellent institution in the evaluation of public service management due to the establishment of an advanced compliance and ethics system.

SELF	See	Eat	Listen	Feel

CEO-Led Integrity Initiatives

UPA has taken the lead in integrity initiatives under the direction of the CEO, raising awareness of the importance of integrity among many employees. The CEO personally recited integrity slogans, operated integrity clinics, and emphasized integrity through sincere online and offline meetings. As a result of these efforts, we achieved the highest ever internal satisfaction score of 96.5 points and received the Public Enterprise CEO Leadership Award from the Korean Association for Public Administration.

Ethical Management

Improving Other Public Institutions' Ethical Management by Spreading Integrity

UPA has enhanced the ethical management level of other public institutions through a collaborative approach to integrity. We provided mentoring to integrity officers at our subsidiaries and measured their integrity levels. At Ulsan Port, we operated an Integrity Academy, offering integrity education and a traditional Korean music-based integrity event. Additionally, we shared UPA's integrity know-how through a benchmarking program with other public institutions, leading to an increase in integrity levels. For these efforts in promoting integrity culture in the public sector, we received the Ethical Management Award from the Korea Academy Of Business Ethics

Spreading Integrity Culture to Other Public Institutions

Integrity Level of Subsidiaries Increased by 9.8 Points to 89.8 (Compared to Public Sector Average of 80.0 Points)	100% Satisfaction Rate Among Participating Institutions in the Academy	Improvement of Integrity Levels by 2 Steps in 2 Institutions

Resolving Integrity Barriers Through Understanding Internal and External Factors

UPA has proactively addressed factors that negatively impact integrity by analyzing low integrity levels in the public sector and eliminating risk factors. The analysis of low integrity factors in other public institutions revealed that personnel violations, procedural violations, and preferential treatment were the most significant issues. Consequently, we fundamentally blocked personnel violation issues by enhancing performance management fairness and established clear port entry procedures to eliminate opportunities for preferential treatment. Additionally, through a feedback process, we identified the need for improvement in three areas: improper budget execution, passive administration, and abusive behavior. We clarified budget execution standards and encouraged proactive administration while also strengthening victim protection for reports of abusive behavior. As a result of implementing transparent and fair policies, we achieved high scores in all integrity categories compared to other public institutions and received the Transparent Management Award from the Korea Management Registrar.

Proactively Removing Integrity Risk Factors

Preventing Personnel Violations through Enhanced Fairness in Performance	Blocking Preferential Treatment by Establishing Port Access Procedures
<ul style="list-style-type: none">Department evaluation: Enhancing transparency through external expert evaluationsRemoval of unfairness through auditor observation during the due diligence processIndividual evaluation: Enhancing rationality through the introduction of downward evaluationsImproving evaluation fairness through the establishment of evaluation verification meetings	<ul style="list-style-type: none">Information collection: Clarification and disclosure of access card informationNecessary information: Establishing basis for collecting required documentsUnnecessary information: Deletion and revision of related regulationsProcess: Establishment of access card issuance procedures and monthly inspections

A Flawless Prevention System That Leaves No Room for Minor Conflicts of Interest

UPA has implemented a comprehensive prevention system to prevent conflicts of interest. Regulations have been strengthened by expanding the scope of the reporting requirement for the work status of retirees from existing contract cases to all contracts. New measures have been introduced, such as inserting warnings about undisclosed information on various document outputs. Additionally, efforts have been made to proactively identify risk factors and remove high-risk elements related to conflicts of interest. In relation to the qualification exam, risks have been mitigated by separating the question-setting committee and the exam operation committee. To prevent any preferential treatment for retired employees, prior reporting to the audit department has been made mandatory for employment with related agencies before retirement. Furthermore, initiatives such as a CEO-led declaration ceremony and an ethics charter compliance pledge campaign have been promoted. To thoroughly prevent conflicts of interest, including preferential treatment for retirees, access cards are systematically destroyed upon retirement, and the disposal status is regularly checked. As a result, out of a total inspection of 5,089 cases related to contract and access card disposal, no violations were found.

Strengthened Conflict of Interest Prevention System

Creating a Sustainable Ulsan Port Reflecting the Voices of the People

UPA has made efforts to ensure that public participation and communication are practically reflected in the operation of the organization. The initiative to promote eco-friendly bunkering and the establishment of a fair and transparent personnel system also started from listening to customer feedback. The decision to inject methanol fuel into the first environmentally-friendly ship was made possible by attracting the world's largest green methanol production company and improving regulations related to eco-friendly bunkering, all of which stemmed from paying attention to customer voices. These efforts have resulted in winning the Grand Prize for Excellent Cases of Active Administration by the Government, certification as a Fair Recruitment Excellence Institution, and an award for excellence at the Port Operation Innovation Competition.

A Control System to Prevent Deterioration of Financial Structure and Accumulate Financial Resilience

UPA managed financial risks through proactive prevention of potential financial soundness risks, enhancement of risk management levels, and preemptive responses to traditional financial risks. To reduce our debt ratio, we cut unnecessary budgets and minimized external borrowings. Additionally, we established a management system to identify, diagnose, and inspect risks, allowing for more systematic risk management. We addressed and managed traditional financial risks early through our regulations, guidelines, ERP, and feasibility assessments. These control systems and efforts helped us prevent the deterioration of our financial structure and secure appropriate financial resilience, enabling effective risk control.

Establishment of UPA Financial Guidelines

Background of the Initiative	Internal	External
	<ul style="list-style-type: none">Current status 125 billion KRW in borrowings maturing between 2024 and 2026. ▶ Need for binding and enforceable norms related to fund execution.	<ul style="list-style-type: none">Current Status 2022 public institution management evaluation findings ▶ Need to establish financial rules reflecting institutional characteristics
Performance	Financial Guidelines Aligned with UPA's Management Goals	Budget Setting and Estimation of Financial Projections
	<ul style="list-style-type: none">2030 management goal Debt ratio below 20%.UPA financial guidelines Budget formulation within a debt ratio of 20%	<ul style="list-style-type: none">Adjusting investment projects linked to management goals and guidelines.Establishing a contingency plan, including financial forecasts and scenario development.
Expected Effects	<ul style="list-style-type: none">Minimization of external borrowings by reducing unnecessary budgets and diversifying funding needs due to the dispersion of investment projects.Establishment of institutional mechanisms for prioritizing resource allocation, which helps accumulate financial resilience and sustain fiscal soundness.	

Risk Management Level Enhancement

Step 01 Risk Identification and Assessment	Identification	- Expanding risk categories and identification scope (adding strategic and operational to financial and legal).
	Evaluation	- Enhancing risk assessment criteria to detail risk levels further.
Step 02 Risk Profile and Inspection System Development	Specification	- Creating profiles for 22 key risks that require focused management.
	Inspection	- Establishing and executing virtual scenarios to check whether internal controls are functioning properly.
Step 03 Risk Governance Establishment	Establishment of Management System	- Establishing UPA Internal Control Committee, enacting "Internal Control Regulations."
		- Signing internal control memorandum of understanding between CEO and auditor, and conducting professional training for employees on internal controls.

Traditional Financial Risk Response and Management

Category	Environmental	Exposure	Management System	Achievements
Interest Rate Risk	- Persistent high interest rates due to global high inflation.	- Financial assets of approximately 110 billion KRW as of the end of 2023.	- UPA Financial Asset Utilization Guidelines (2022)	Minimizing liquid funds and maximizing investment funds.
	- A short-term liquidity risk with a basic liquid fund of 5 billion KRW in 2023.	- Delays in payments due to short-term liquidity shortages	- ERP - Transaction Financial Institution CMS	Preparing daily cash management, monthly fund operation performance, planning, and cash execution forecasts.
Debt Risk	- 125 billion KRW in borrowings maturing 2024-2026	- Future investment project costs of approximately 460 billion KRW.	- UPA Financial Guidelines (2023)	Enhancing loan repayment capacity and reducing total debt and ratios through tailored debt management.
	- Concerns about a decline in UPA's credit rating due to worsening financial indicators	- Rising funding rates for loan repayments and investment projects.	- Business Feasibility Assessment - Financial Guidelines and Budget Principles	Maintaining the highest credit rating with AAA from 3 domestic credit rating agencies.

Dear UPA Management and Stakeholders,

Evaluation Criteria

The Institute for Public K-ESG has developed the 'Public Institution K-ESG Implementation Evaluation Checklist' based on the K-ESG Guidelines published by the Ministry of Trade, Industry, and Energy. The checklist consists of 66 items across four areas: Information Disclosure, Environment, Society, And Governance, and includes performance diagnostics for each ESG area. To ensure the reliability and comparability of the evaluation, the evaluation specialist organization iMSR conducted the K-ESG level assessment for UPA.

Diagnostic Scope

The Institute for Public K-ESG and iMSR conducted a diagnostic evaluation of UPA's mid- to long-term strategies, stakeholder communication, ESG management activities, and strategy implementation processes. The evaluation was carried out by comprehensively reviewing corporate disclosure information, government disclosure information, media reports, internal performance data, and output systems from a stakeholder perspective regarding ESG-related policies and activities.

Diagnostic Method

The Institute for Public K-ESG and iMSR conducted an initial self-diagnosis through internal stakeholders from various departments related to public institution management evaluation and the publication of the Sustainability Report. The second diagnosis involved a site visit by the evaluation team to UPA, where they verified internal documents and conducted interviews with responsible personnel to carry out an on-site investigation.

I. Information Disclosure Aspect

UPA provides balanced ESG-related information that can influence the decision-making and value judgments of various stakeholders. Currently, the organization discloses ESG information up to the business sites it legally owns. However, it will be necessary to expand the scope of information disclosure to include the areas within UPA's influence and control, such as the supply chain.

II. Environmental Aspect

UPA systematically minimizes environmental impacts throughout its business operations and pursues economically sustainable development. The organization has well-established environmental management goals, development, implementation, achievement, review, and maintenance processes, with excellent performance management. However, it will be necessary to enhance the management of Scope 3 data, which includes the supply chain and partner companies within the organization's influence and control.

III. Social Aspect

UPA excels in goal setting and disclosure, Health and Safety promotion systems, diversity and gender equality, and social contributions. However, efforts are needed to spread ESG management among partner companies and to promote industry-academia collaboration. Moving forward, a more proactive approach will be required, including the advancement of systematic strategies, the promotion of win-win cooperation, and the implementation of mutual growth activities.

IV. Governance Aspect

UPA operates with sound governance in accordance with the laws governing public institutions. For better governance, continuous disclosure of improvement activities related to the prevention of reoccurrence of ethical norm violations and securing the expertise of the audit organization will be necessary.

K-ESG Guideline Index

Area	Category	Classification Number	Item	Page	Remarks
Information disclosure (P)	Information disclosure format	P-1-1	Information disclosure method	About this report	●

Diagnostic Results

UPA has been evaluated as having a system in place for the practice of ESG management, having achieved an A grade in the K-ESG level assessment. UPA is in the process of expanding ESG management throughout the organization, with excellent implementation levels in areas such as information disclosure, environmental management, labor, industrial safety, human rights, co-growth, and ethical management. To ensure that the public purpose of contributing to regional balance and the development of the national economy through the advancement of the port logistics industry and community engagement is solidly realized based on the K-ESG Guidelines, it is recommended to review the enhancement of implementation tasks in conjunction with business strategies from an ESG perspective. Additionally, it is advised to emphasize the role of UPA more actively to stakeholders through transparent disclosures.

* The K-ESG implementation evaluation is categorized into seven grades (S, A+, A, B+, B, C, D) and is based on business reports, official websites, sustainability management reports, ALIO (Clean Eye), and evaluation questionnaires from the Korea Public ESG Institute. For more details, please visit [http:// www.esgpublic.or.kr](http://www.esgpublic.or.kr).

Third-Party Assurance Statement

To readers of 2024 UPA Sustainability Report

Preface

The Institute for Public K-ESG has been requested to verify ‘2024 UPA Sustainability Report’ (hereinafter referred to as the ‘Report’). The responsibility for the preparation of the report lies with UPA, and the responsibility of the Institute for Public K-ESG is to issue a verification opinion on specific data and information within the scope specified below.

Scope and Standards

UPA describes the organization’s achievements and activities related to sustainability in its report. Our assurance team applied the international verification standards of AA1000A V3 and carried out a type 2, moderate-level assurance. That is, evaluation was performed on compliance with the principles of inclusivity, materiality, and responsiveness, and the reliability of the data and information was evaluated on the Global Reporting Initiative (GRI) Index provided below. Here, the standard for materiality was applied based on the professional judgment of the assurance team.

The scope of assurance included the operations and activities of UPA’s domestic business sites, and our assurance team reviewed the following items to confirm this.

- Evaluation of compliance with AA1000 AccountAbility principles, namely Inclusivity, Materiality, Responsiveness, and Impact
- Verification of whether the report was prepared in accordance with GRI Standards
- Assessment of the accuracy and reliability of the data and information for the following indicators included in the GRI Content Index

- GRI 200(Economic): 201-1, 201-2, 203-1, 203-2, 205-1, 205-2, 205-3
- GRI 300(Environmental): 302-1, 302-2, 303-5, 304-2, 305-1, 305-2, 305-3, 305-5, 305-7, 306-2, 306-3
- GRI 400(Social): 401-1, 401-2, 401-3, 402-1, 403-1, 403-2, 403-3, 403-4, 403-5, 403-6, 403-7, 403-8, 403-9, 403-10, 404-1, 404-2, 405-1, 405-2, 406-1, 413-1, 416-1, 416-2, 418-1
- Work-related injury rate, work-related illness rate

Data and information regarding external organizations, such as UPA’s partner companies and contractors, have been excluded from the scope of verification in this report.

Assurance Procedure

The assurance team of the Institute for Public K-ESG followed the procedures outlined below to verify the agreed-upon assurance scope according to the verification criteria described above.

01 | Overall review of the contents of the report

02 | Review of the materiality assessment procedures and methods

03 | Review of the ESG management strategy and goals

04 | Review of stakeholder engagement activities

05 | Interviews with responsible personnel regarding the report preparation

06 | Assessment of the reliability of information based on independent external sources and public databases

Third-Party Assurance Statement

Results and Opinion

The assurance team engaged in multiple discussions with UPA regarding the report revisions based on the results of document reviews and interviews and reviewed the final materials to ensure that the modifications and improvement recommendations were adequately incorporated. As a result of the assurance, the team found no inappropriate aspects related to compliance with the principles listed below in UPA's ESG · Sustainability Report. No issues were identified that would indicate the data included in the assurance scope were improperly reported. It is determined that the ESG · Sustainability Report has been appropriately prepared in accordance with the international standard guidelines GRI Standards 2021, and the assurance opinion regarding the four principles presented in AA1000AP (2018) is as follows.

Inclusivity	Inclusivity refers to involving stakeholders in the process of developing and achieving responsible and strategic responses to sustainability. UPA is committed to its responsibilities towards stakeholders and has developed and maintained various forms and levels of stakeholder communication channels to implement this commitment. The assurance team did not find any significant stakeholder groups that were omitted in this process.
Materiality	Materiality refers to determining the relevance and significance of an issue to the organization and its stakeholders. In this context, a material issue is one that can influence the decisions, actions, and performance of the organization or its stakeholders. UPA determines the materiality of issues identified through stakeholder communication channels using its own materiality assessment process. The assurance team did not find any significant issues that were omitted in this process.
Responsiveness	Responsiveness refers to an organization's actions concerning significant sustainability topics and related impacts, specifically the management processes for material topics determined through materiality assessment. UPA manages policies, task performance status, activity outcomes, and improvement plans for material topics to respond to stakeholder expectations appropriately. The assurance team did not find any missing processes in this regard.
Impact	Impact refers to an organization's response to stakeholder issues that affect its sustainability performance, realized through communication with stakeholders as well as through the organization's decision-making, activities, and outcomes. The assurance team did not find any evidence that UPA's response activities to significant stakeholder issues were inappropriately described in the report.

Recommendations for Improvement

The Institute for Public K-ESG hopes that the report published by UPA will be actively utilized as a means of stakeholder communication and recommends the following for continuous improvement: UPA's effort to reorganize topics derived from the materiality assessment into categories of ESG management issues and report them in an easy-to-understand manner for readers is commendable. Moving forward, we recommend establishing key performance indicators based on a mid-to-long term strategy for the systematic promotion of ESG management and continuously striving to enhance the organization's sustainability.

Independence of Assurance

The Institute for Public K-ESG maintains independence by not having any profit-oriented interests in UPA's business activities apart from providing third-party assurance services.

SDGs and UNGC Principles

UN Sustainable Development Goals

The SDGs (Sustainable Development Goals) are the agendas of 17 common goals of mankind for the resolution in the general assembly of UN to accomplish by the year 2030 to realize the ideology of sustainable development. The SDGs present the directivity for mankind to move forward in 5 areas of People, Planet, Prosperity, Peace and Partnership with 17 goals and 169 specific goals. UPA actively supports UN Sustainable Development Goals for the sustainable development. We have done our best to secure the sustainability in the process of managing the businesses.

1. No Poverty 2. Zero Hunger 3. Good Health and Well-being 4. Quality Education 5. Gender Equality
6. Clean Water and Sanitation 7. Affordable and Clean Energy 8. Decent Work and Economic Growth
9. Industry, Innovation and Infrastructure 10. Reduced Inequality 11. Sustainable Cities and Communities
12. Responsible Consumption and Production 13. Climate Action 14. Life Below Water 15. Life On Land
16. Peace, Justice and Strong Institutions 17. Partnerships for the Goals

UN Global Compact

UPA has been adhering to the 10 principles regarding human rights, labor, environment, and anti-corruption since joining the UN Global Compact.

Category	Number	Principle
Human Rights	Principle 1	Business should support and respect the protection of internationally proclaimed human rights.
	Principle 2	Businesses should make sure that they are not complicit in human rights abuses.
Labor	Principle 3	Business should uphold the freedom of association and the effective recognition of the right to collective bargaining.
	Principle 4	Businesses should uphold the elimination of all forms of forced and compulsory labour.
	Principle 5	Businesses should uphold the effective abolition of child labour.
	Principle 6	Businesses should uphold the elimination of discrimination in respect of employment and occupation.
Environmental	Principle 7	Business should support a precautionary approach to environmental challenges.
	Principle 8	Business should undertake initiatives to promote greater environmental responsibility.
	Principle 9	Business should encourage the development and diffusion of environmentally friendly technologies.
Anti-corruption	Principle 10	Businesses should work against corruption in all its forms, including extortion and bribery.
